### Supreme Court Lets Bond Stand In Pennzoil Case

Compiled by Our Staff From Disputches WASHINGTON -- The Sureme Court ruled Monday that a federal judge mistakenly excused Texaco Inc. from posting a poten-tially ruinous \$11 billion bond in its court battle with Pennzoil Co.

In a 9-0 vote, the justices overturned a federal court ruling that Texaco need post only \$1 billion in security while the case is pending in the courts.

Monday's ruling left open the possibility that Texaco could avoid posting the \$11 billion bond through a successful appeal in Texas state courts.

However, analysts said, it also greatly increased pressure on Texaco to settle its dispute with Pennzoil

On the New York Stock Exchange on Monday, the pressure took the form of a drop in Texaco's shares, which were off \$4.00 at \$33,625. In London, Texaco's conventional fixed-rate Eurobonds were trading 3 to 4 points lower.

The \$11 billion bond was ordered after a state court jury found in 1985 that Texaco had improperly interfered with Pennzoil's planned acquisition of an interest in Getty Oil Co. The jury awarded Pennzoil \$11.1 billion against Tex-

An appeals court reduced the jury award to \$8,5 billion. But with interest payments, the total amount that would be owed by Texaco is approximately \$11 billion, Texaco vers say.

Associate Justice Lewis F. Powell, writing for the Supreme Court, said Monday that Judge Charles Brient of U.S. District Court in White Plains, New York, "should have abstained" rather than reduce Texaco's bond.

Justice Powell said federal judges should not rule in such cases until state courts have bad the opportunity to review the issues raised.

He said the constitutionality of the S11 billion bond, which Texaco has said could drive it into hankrupicy, is best left to the Texas

By Richard Halloran New York Times Service WASHINGTON - The first documentary evidence of a secret agreement permitting the United States to take nuclear arms into Japan has been uncovered by the

Japanese Communist Party. Under a "transit agreement," a confidential addition to the 1960 U.S.-Japan mutual security treaty, American warships and warplanes may carry nuclear arms into and out of Japan, but may not store

them in Japan, nor launch the weapons from there. The existence of the transit agreement has been reported in the press since 1971. In each case, however. State Department and Japanese officials, fearing a political

backlash from the atomic bombings of 1945, bave flatly denied that the accord had been reached. Now, the Japanese Communist Party has discovered in the Library

of Congress here a microfilmed copy of a State Department tele-gram sent to the U.S. Embassy in Tokyo that clearly alludes to the agreement on nuclear arms. The telegram, dated Feb. 24, 1966, referred to "confidential ar-

rangements with U.S. on introduction of nuclear weapons under 1960 security treaty," expressing con-cern they would be undermined if Japan accepted a Soviet proposal that Japan be declared a nuclearfree zone

A check of the microfilmed files

to be authentic. It was drafted by William L. Givens and approved by Robert A. Fearey, who were senior officers dealing with Japan at the time, and was signed by Sccretary of State Dean Rusk. The telegram was declassified from its secret status on Sept. 14, 1977.

**On Nuclear Arms Found** 

to political violence.

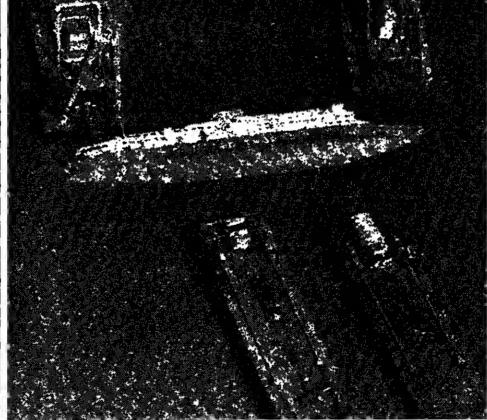

See KOREA, Page 4

A State Department spokesman said that "we are now in the process of checking the authenticity of the document and will not comment on its content until we have done so." . All Japanese governments bave subscribed to what are known in Tokyo as the three nonnuclear principles, under which Japan will neither build nor acquire nuclear weapons, nor permit them to be

introduced into Japan. The 1966 telegram was written in the context of a proposal by the. Soviet prime minister, Alexei N. Kosygin, that nations with nuclear arms would assure nations without nuclear arms that they would not be attacked as long as they did not

acquire such weapons. In the telegram, the State Department warned the embassy that if Japan adopted the Kosygin proposal, "it is possible that the ambiguity the government of Japan has accepted on presence of nuclear weapons in U.S. vessels in Japanese ports and on transiting U.S. aircraft might no longer be accepted." The ambiguity referred to a Japanese practice of never asking the United States whether American

warships or aircraft were, in iact, of the library showed the telegram armed with nuclear weapons.

SALVAGE OPERATION - Preparations were completed Monday to right a British car farty, the Herald of Free Enterprise, that capsized March 6 killing nearly 200 people. As the huge pulleys were set to winch the boat upright Tuesday, the British news agency Press Association reported that a steward on the ferry had warned senior crew of impending disaster minutes before it sank off the Belgian port of Zeebrugge.

bond equal to the amount of the jury award could drive Texaco out of business, effectively denying it the right to appeal. The Supreme Court's decision

# Hungary Puts Socialism **On a Capitalist Footing**

By Jackson Dichl Washington Post Service BUDAPEST --- A crush of shoppers navigate carts past counters piled high with sausages in the food department of the Skala cooperative store here.

Buyers cluster around bins of fresh vegetables abundant even in the depths of winter. Some grind up their own custom-mixed coffee beans while listening to the soothing tones of piped-in pop music. The scene at Skala on a typical

day is revealing when compared with that of a food store in Romania, Hungary's neighbor. There, the dirty, dimly lighted

stores operated by the state are often devoid of meat and vegetables other than withered carrois and turnips. Coffee is unheard of. Some shops, in fact, offer only bones, but are nevertheless besieged by long lines of customers.

The shopping market gap be-tween these two Soviet allies, largely nonexistent 30 years ago, provides a quick sense of the potential significance of economic change in the Communist world. While Romania is still governed by the economic system installed by Stalin in the Soviet Union during the 1930s, Hungary since 1968 has been a pio-

neer in modifying that system. Skala's abundance suggests that these changes could have revolu-

Second in a series of articles

tionary impact if extended by the Soviet leader, Mikhail S. Gorbachev, to the rest of the Eastern bloc. Life in this country of 10 million has become far more free, prosperous and fast-paced as a direct result of its tinkering with the economy. Yet after nearly 20 years of pioneering the economic change of Soviet socialism, Hungary's economists and political leaders are also beginning to reach some painful conclusions about their policy.

Despite introducing many of the economic instruments of Western capitalism, ranging from bankruptcies and personal profitmaking to bond-trading, shareholding and even local branches of Citibank and McDonalds, the Hungarians have been unable to make their economy competitive with that of the West or to end years of stagnation.

By now, too, the dilemma of Communist planners is clear: To make reform work in this country, even more radical departures from the socialist system will be necessary. Yet if Hungary and the Eastern bloc take those steps, both the legitimacy of Communist rule and its fundamental identity as a movement offering a different economic system will be subject to challenge. Already, one of the most star-

# Fame in the '80s: What's a Dinner Party Without a White-Collar Criminal?

### By Georgia Dullea New York Times Service

NEW YORK -A dream dinner party, in some strata of New York society, would include Ivan F. Boesky and Jean S. Harris, if she happens to be free. The notoriety achieved by both is said to qualify them for the A-list among hosts like Carolina and Reinaldo Herrera.

"They would add spice to the evening," Mr. Herrera speculated, "because she was convicted of murder and be pleaded guilty to robbing nearly the world. But most normal bouses don't have these great names at their fingertips." Mr. Herrera, an editor at Vanity Fair magazine, and his

wife, the fashion designer. rely on friends like Claus von Bulow — a social figure who was convicted, and then acquitted in a retrial, of trying to murder his wife - to create dinner party chemistry.

"Claus is a great catalyst," he said. "People instantly loathe him or like him."

This comes as no surprise to the Popular Culture Association, whose 3,000 academicians scrutinize best-selling books, movies and television shows as well as newspaper gossip columns in search of cultural trends.

One clear trend is that the lines between fame and notoriattribute this to a decline in ethical standards and to the so-sation, hostesses say. Marshall Fishwick, a humanities professor at Virginia called celebrity gap. The great maw of television has been so

quick to devour movie stars and other conventional celebri-des, they say, that it must invent new kinds to feed on. the parallel to the 1960s.

Never before have Americans been so desirous of brushing up against the notorious and the wealthy," said Ray Browne, head of the popular culture department at Bowling Green State University in Ohio. students, "These people are a force in television, magazines, books, cal chic."

every medium. We're mad to be in the same room with them, to let a little of the danger they engaged in rub off on us. If they're well-born like von Bulow or the Mayflower Madam, well, that makes it even more wonderful because we're trading up."

Nowhere is it more wonderful than in New York, where people whose lives have been touched by scandal - among them Mr. von Bulow: Sydney Biddle Barrows, who is popularly known as the "Mayflower Madam," and Steve Rubell, the co-owner of the Studio 54 discotheque, who was sentenced to prison for tax evasion - have emerged from their ordeals to become social lightning rods.

Their appearance at otherwise dull gatherings prompts whispers of "Guess who's here." Their names pop up in society cohmns, on guest lists for charity events and on place cards at fashionable dinners. It helps that they already one clear denses and more blurry. Academicians know how to hold a cocktail glass and a meaningless conver-

the parallel to the 1960s. "In those days," he recalled, "the rage was to have a radical in your living room - Rap Brown or Angela Davis." The phenomenon was chronicled by one of his former students, the writer Tom Wolfe, who coined the term "radi-

Yet as Mr. Fishwick noted, the celebrities of the 1960s were worlds apart from those of the 80s. Their backgrounds differed sharply from those in the social set that courted them. Their causes were political and even revolutionary.

By contrast, said Neil Postman, a communications professor at New York University and an authority on television's cultural impact, "Today we have white-collar characters doing things we can identify with - cheating on taxes, manipulating stocks, prostitution." He was referring respectively to Mr. Rubell, Mr. Boesky and Miss Barrows.

"In an age when political interests are dulled, these people are acting in their own self-interests." he added. "It's a new version of the old entrepreneurial impulse that Ronald Reagan savs made this country great."

In "redefining crime and the meaning of crime" Mr. Fishwick said, "we've let a lot of people into the house who would formerly have been dismissed. In fact, we half envy them.

# **Poland Says Big Changes Are Coming** In Economy

STOCKHOLM - Poland will soon offer shares to private citizens in several state companies to rejuvenate its socialist economy, and it might even open a stock exchange one day, a Polish official said Monday.

The economy had to be made more responsive to market forces, the government spokesman, Jerzy Urban, said at a news conference in Stockholm. He is here to give a lecture at the Foreign Policy Institute on Tuesday.

Mr. Urban said that under changes to be unveiled in a few weeks, "the whole leadership of the Polish economy and its manage-ment methods will be replaced."

Private individuals would be offered shares in state companies to stimulate a new entrepreneurship, he said, and state subsidies to industry would be cut.

"This definitely means stepping out of the system of centrally subsidized industry," he said. "We shall try to cut subsidies by 15 percent this year so that the outdated and unprofitable parts of industry go bankrupt."

Asked whether the share offer-ness meant Poland planned to start HUNGARY: Budapest Tries to Put Socialism on Sound Capitalist Footing Ads on TV ings meant Poland planned to start a full-fledged stock exchange, Mr. Urban replied:

nomic system after two decades of "Plans to start a classic slock market like London's have not change is that its managers confess been included in existing projects, but if there is a demand for it and if it proves necessary or suitable for the good of the Polish economy, we would not refrain from it.".

He gave no examples of which state companies might end up being co-owned by individuals, but said no branch of the economy would be excluded from the changes

# Big Strike Turnout Awaited in Spain

MADRID (Reuters) - Spanish trade unions said Monday the expected nearly one million workers to join strikes this week to prothe government's economic susterity policies. Doctors, hospital, siring and railway workers, bus drivers, civil servants, building employees and metal workers say they will strike in response to a call by the Workers Commissions union.

The union, which is led by Communists, failed to win support for a general strike from the Socialist General Union of Workers and issued its own call for a week of protest against the government's conservative economic management, which it blames for Spain's high unemployment. On Friday, the state railway network, the national airlines Ibera and

Aviaco, and the Madrid subway system are expected to be at a virtual halt in a dress rehearsal for a transport strike over the Easter holiday.

# Embassy Security in Moscow Derided

MOSCOW (AP) -Security at the U.S. Embassy in Moscow has been "fully compromised," and it will take tens of millions of dollars to fix the damage, a U.S. congressman said Monday after impecting the building. Representative Daniel A. Mica, Democrat of Florida, and Representa-

tive Olympia J. Snowe, Republican of Maine, spoke to reporters in from of the embassy after a pre-dawn tour of the building and interviews with percound them for most of the day

Mr. Herzog was returning a visit made to Israel 18 months ago by the West German president, Richard von Weizsäecker, who accompanied him to Bergen-Belsen. In his speech prepared for Mon-

day evening, Mr. von Weizsäecker called Mr. Herzog's visit "a very special occasion in the history of our nations."

He added: "No Israeli can meet German without remembering the sufferings of the Jews under National Socialism."

He said that West Germany supported the Palestinians' right to self-determination "as for all nations," but added that "this cannot

be at the cost of other nations." Mr. Herzog greeted a group of nine Bergen-Belsen survivors, including seven who flew to Belsen from the United States for the event. He first met them in 1942

while serving as an officer in the British Army. Recalling the starved, diseased victims liberated in April 1945, Mr. Herzog said, "The memory of those shocking sights will never, ever leave me."

Bergen-Belsen was not a death mp, like Auschwitz, where Jews and other victims were gassed or otherwise systematically murdered. It was a concentration camp where victims were assembled in the last two years of the war. Starvation of inmates, deaths from ty-phoid and other diseases were common. and 50,000 Jews and other

inmates died here from 1943 to 1945. In addition, 50,000 Soviet pris-

oners died before 1943, when Bergen-Beisen was used as a prisoner of war camp.

# This week from IBM: Introducing the Personal System/2, the Future Principle in personal computing.

Model 60-041

We proudly present the IBM Personal System/2<sup>TM</sup>, a new family of productivity tools that will shape the future of personal computing. And it's designed to integrate technological innovations that IBM creates in the years to come.

THE A

The new family: designed for today nnd tamorrow.

That's what we call the Future Principle: it makes your investment future proof. And with this new range, businesses of all sizes can afford today's most advanced technology – without worrying about it becoming obsolete the day after tomorrow. TMIBM Personal System/2 is a trademark of the IBM Corporation.

and a state of the second s

The basis of the Future Principle is openness, both for technological developments and vast application possibilities. The Personal System/2 connects up, to more powerful IBM computers. Down, to less sophisticated members of the family. Back, to existing IBM Personal Computers. Forward, to future IBM systems. And sideways, to outside data sources.

The Personal System/2 sets new standards of speed and storage capacity. 3.4 million instructions per second make our top models faster than many of today's personal computers. Our new 3 1/2-inch diskettes provide twice the storage space of the old standard, in a compact, durable package. Converters let you transfer data and files from existing PCs to the new family. So the future of the past is safe.

Our new displays are real eyeopeners. They give you sharp, clear images that you have to see to believe. Plus a choice of 262,144 colours.

New displays: they tilt and strivel - so you don't have to.

And the next step: the Future Principle in software. It's a powerful new operating system designed especially to take advantage of the Personal System/2's advanced technology. It will let you run much more sophisticated applications, yet still run current PC DOS programs.

You can take a look at your future today, when you visit an IBM Authorised Dealer or IBM representative. Stop by for a Personal System/2 demonstration, and an overview of the eight different models in our new family.

# For Errant Fundamentalists, a Hot Line

#### By William E. Geist New York Times Service

NEW YORK - "This is terribly upsetting," said Ginger Harney, 76, a California woman who was sending money to the TV evangelists Jim and Tammy Bakker until the scandal involving charges of adultery, hush money and drug abuse erupted. Miss Harney said she has cried herself to sleep several nights since.

She is one of thousands of fundamentalists throughout the country who are overwhelming the tiny staff of Fundamentalists Anonymous, or FA, in New York, with telephone calls and letters. The group operates from an unfinished church basement in Manhattan, wishing to keep the exact location secret because of threats, a spokesman said.

The complaints hy fundamentalists --- people who believe the Scriptures are infallible and are to be taken literally - are ranging from simple disillusionment with most TV evangelists, whn have been engaging in a war of words with each other, to callers claiming that fundamentalism has caused them bankruptcy, divorce and suicidal depression. One caller said her husband chained her in the basement for three months trying to get the devil out nf her.

The purpose of the group, a co-founder, Richard Yao, said Friday between calls, "is to provide a place for disillusioned fundamentalists to share the trauma of breaking free." Those calling the hot line receive a newsletter and referral to one of 41 chapters across

the country serving the group's 30,000 members. The group's budget was about \$20,000 last fiscal year, but could reach \$300,000 at the end of the current fiscal year, said Mr. Yao, who points proudly to the Reverend Jerry Falwell's attacks on FA as proof it is having an effect.

Callers said they learned about the group through newspaper articles and television appearances by members. "We don't argue theology," said Mr. Yao,

31, a graduate of Yale Divinity School and New York University's law school. "We're concerned with the mind-set. Jimmy Carter is a fundamentalist, but without this authoritarian compulsive intolerant mind-set that many do have. He doesn't say I believe in A, B and C, and if you dnn't, you're going to burn in bell."

"If the fundamentalist experience is working for you, fine, but we're here if it isn't," said Mr. Yao, who quit his job with the Wall Street law firm of Mudge Rose Guthrie Alexander & Fenton two years ago to begin the group with Jim Luce, 27, a former assistant bond portfulio manager with Daiwa Bank. Mr. Yao had been raised a fundamentalist in the Philippines; Mr. Luce was disturbed by the growth of fundamentalism in his home town of Marietta, Ohio, and throughout the country.

"This is not an anti-Christian group," said Mr. Luce, who is a trustee of Madison Avenue Baptist Church. Mr. Yao is a member of the church.

"I sent every cent I could get my hands on to Jimmy Swaggert, the PTL Club and the 700 Club," said Judy Haddow, of Dallas, who called FA. "When I ran out of money I cut back-nn my food budget. I atc popcorn for two weeks so 1 could send more.

"My fundamentalist church taught that women must be subservient to their husbands, just as husbands are subservient to God. He beat me and the pastor said it was my fault because I wasn't praying enough, 1 was suicidal.

"I'm still a Christian," she said. "But 1 can't go into a church. I'm scared of those people with the smiles."

Ruth Donaldson of Atlanta said, "Oral Roberts and these others are like bottomless nits."

She said she called FA after leaving her fundamentalist Southern Baptist church and feeling extreme depression.

"We had been told nnt in watch any TV or listen to any records or read any books that were not stamped 'Christian.' They set an impossible standard and people always felt unhappy, with guilt and depression.

"We were told to give sacrificially," she said, "and I went into debt giving to the TV Miss Harney said: "You have no idea how

heartbreaking this is. I don't know what to do. I don't know what's going on. "The preachers say it's just the devil trying to put them out of business. Could that be?"

Oral Roberts during recent sermon in Rockwall, Texas.

# Bush, Evangelist Locked In Struggle for Votes of Conservative Christians

By Phil Gailey New York Times Service

COLUMBIA, South Carolina ---A bitter power struggle between South. Carolina Republicans and mangefical Christians underscores the growing tension between the followers of the Reverend Pat Robertson and Vice President George Bush and raises the prospect of Republicans' alienating an important voting constituency, conservative Christians.

At a Republican meeting here last weekend, party regulars loyal to Mr. Bush turned back a push by Robertson forces to win control of the party in the state's most populous county.

But then tactics have left a rear due of rancor that could eventually drive away from the party the conservative Christians who were an important part of Ronald Reagan's winning coalition in 1980 and 1984, according to party strategists and other political experts.

For Mr. Bush and his supporters, a central question in the tests of strength in the months ahead is

clear forces within six months. Put-

tians.

Many countryaition Christian are flying the presidential banner of the Christian broadcaster, who is exploring the possibility of a campaign. Although these voters are not considered essential to Mr. Bush's bid for the nomination, they could be crucial to his chances in a general election, especially in the South.

South Carolina figures - promi-nently in Mr. Bush's Southern strategy in 1988.

For mething, it is the home state of his campaign manager. Les Atwater, who, at least publicly, has Arwater, who, at least photody, as's kept his distance from the fighting. State Republicans have set their presidential primary for March S. 1988, three days before more than a dozen Southern and border states hold primaries on what politicians are calling "super Tuesday."

"It's pretty clear the Bush people want to give him a big victory in South Carolina just before super Tuesday," said a Robertson loyal ist here. "But the way they're going about it could be a costly mistake."

The problem the Republican Party faces in trying to assimilate conternative Christians was highlighted Saturday at a Republican meeting in Richland County, which includes Columbia. Party leaders invited a local rabbi to deliver the invocation, which they acknowledged was intended to rankle the. evangelicals.

Caught off guard by the success of the Robertson forces in last month's election of precinct-level delegates, party regulars aligned with Mr. Bush managed to maintain control only by invoking obscure rules, which they conceded had never been enforced before, to disqualify almost 100 Robertson delegates.

Citing a party rule that requires a delegate to have registered to vote, 30 days before the precinct elections, the Republican regulars were able to disqualify 93 Robertson delogates. They also reconvened meetings on Friday in 23 precincts where Bush forces had a majority and filled 91 vacancies.

One possibility, along with U.S. miclear-equipped ancialt stationed in Europe, is the British and French Those actions effectively deprived, the Robertson camp of a majority. Of the 726 delegates seated at the county convention, approximately 390 voted with the local party leadership. -

The Robertson confition maintained that both actions were in violation of election law and party roles and filed a lawsuit against the local party. A hearing has been set. for Thursday, If the Robertson people prevail in the courtroom, a new convention would have to be called. -

NORTON, Kansas - A couple stranded in their car for 13 days "Tain absolutely astounded that survived on Girl Scout cookies, diet the people in Richland County soda and prayer until a farmer saw, don't believe in the democratic protheir car among roof-high snow cass," Mr. Robertson said at a news drifts. tian, and by some estimates that share could double within 15 years.

In the last year, Buddhists, who number about 30 percent of the population, also have become rest same social and political goals as Christian groups; partly they are simply seeking more autonomy from the government in controlling Buddhist sites such as tempies.

The government brands much of the oppositinn, particularly the students, as Communists and support-ed by North Korea. A pamphlet distributed by the government this year stated: "There is no doubt that the ultimate goal of these ever-

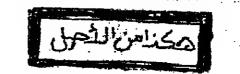

growing leftists is to spread socialist ideology among the populace and eventually nnify the Korean Peninsula under the control of the North Knrean Chramunist re-

Certainly sume of the govern-ment's opponents are die-hard Communists and admirers of the North Korean personality cult of Kim Il Sung, "Let us go, go to the paradise in the North," readant leaflet distributed at Sangi Univer-sity in the northeastern city of Woniu Vet such acceleration Wonju. Yet such people seem rare. Most opponents of the govern-ment, whether familiar leaders like Kim Dae Jung or abscure rebels like Ko Ho Seok, disayow Communism. Many favor measures to redistribute national income; many also favor stronger labor unions. Their prescriptions do not sound radical, but to Western ears they may seem imprecise or unrealistic. Many students, for example, speak longingly of "unification" of the Korean Peninsula, but they are vagne about how this is to be done.

line of work.

nouncement that was big news in Tokyo, he declared that the "hlossom front" had started on its customary northward path from southwestern Japan and would reach Tokyo unusually early, on March 24. Actually, it came a day ahead of schedule, but in Mr. Na-kayama's book that fell safely within the allowable margin for error. "I've never been wrong," he said,

adding with a smile that this was only his second year on the cherryblossom assignment. For Japanese, the overriding significance of the annual exercise is as clear as the spring rain. Cherry blossoms qualify as one

mats. The sheets are spread on the indexyama was not about to aban-on custom. Ches, but nobody, it would seem, grass or coactete park lancs, every-has told the Japanese that. And if body taking care to remove their back time, he snipped 10 buds anybody did, one senses they apanese as some yoshino, or thous vedoensis for the Latio.

This year, the blossoms provide a an act of obligation, and they disneeded respite from what has been far from a silent spring. Trade fric-tions have rubbed themselves raw, patch junior employees hours ahead of time to lay claim to the best sites. In Tokyo's sprawling tempers are fraved by a proposed Ueno Park, these fellows are easily sales tax, the economy has turned spotted. Almost invariably, they are the ones in tan raincoats, standing alone in stocking feet on strips plastic or cardboard, trying not to look miserable.

> "Pretty cold, don't you think?" a solitary young man said the other day, hunching his shoulders in the chill of an early-spring sunset.

beans and, judging from public-opinion polls, the prime minister Meteorologists are more elosely watched in Japan than in many other countries. They must submit written reports whenever they err may soon be looking for another by more than 5 degrees in their So, as much in escape as ritual, Tokyo residents have flocked to temperature forecasts or whenever parks by the countless thousands to predictions of rain fail to come true. This requirement does not apview the cherry blossoms before ply to Mr. Nakayama, but it might they drop off. The Japanese do this, as they do so many things, in orgaas well for all the effort that he

nized groups and with a sameness pours into his work. On Feb. 26, Mr. Nakayama said, that they often find comforting. he saw that the average weight was They hold blossom-viewing, or two one-hundredths of an ounce, hanami, parties, which essentially and he knew - don't ask how, he just knew --- that the blonming are picnics held on plastic sheets or would begin before March 25. cardboard squares serving as straw

YOU EXPECT MORE COMFORT FROM PANAM.

AND YOU SHOULD.

French 'Red Millionaire' Dies at 67 PARIS -- Jean-Baptiste Doumeng, 67, a French Communist known as "the Red Millionaire," and who acquired a fortune trading agricultural products to the Soviet bloc, died Monday near Toulouse. A spokesman for his company

said Mr. Doumeng died after a long illness following a series of gall bladder operations. The French Communist Party's

Central Committee, meeting in Paris, stood in silence to honor Mr. Doumeng, who joined the party as a teen-age farm boy and had remained one of its strongest supporters.

Mr. Doumeng was a controversial figure in East-West trade with his sales of of subsidized European Community surplus butter, beef and other foodstuffs to Eastern Eu-

Burly, outspoken and ready to use strong language to voice his opinions, he had a wealthy lifestyle and owned a stable of racchorses, an executive jet and a large estate in southwestern France,

Born in a family of poor farm laborers, he left primary school to become a shepherd. "We lived in appailing conditions," he once recalled. "It was a shame and an affront."

Mr. Doumeng personally knew all the Soviet leaders of the past 25

Jean-Baptiste Doumeng

to shop for food.

The Chatila convoy was only the roary.

Residents said people feared a repetition of an incident Friday in which a truck loaded with Saudi Arabian relief supplies was set ablaze by a rocket in the center of

years. In 1983, he boasted of being the only remaining living French Communist to have lunched with Stalin. He remained a welcome

guest at the Kremlin. A year later he told a French magazine that "if God invented the Soviet Union, it was to teach the rest of the world a lesson."

#### Chief Leabua Jonathan, Ex-Leader of Lesotho

HARARE, Zimbabwe (Reuters) - Chief Leabua Jonathan, 73, the former Lesotho prime minister, has died of stomach cancer, official sources in Maseru, the capital of

Lesotho, said Monday. Chief Jonathan ruled Lesotho for 20 years before his overthrow by the military in January 1986. He became prime minister when Lesotho gained independence from Britain in 1966 and ruled the kingoverthrow. Lesotho is surrounded by and economically dependent on South Africa.

#### **Osman Saleh Sabbe** Ethiopia Rebel Leader

CAJRO (AP) - Osman Salet Sable, 55, the Ethiopian rebel lead-er who was the chairman of the executive committee of the Eritrean Liberation Front-Unified Orga-nization, died Saturday in a Cairo hospital.

A statement from the organization said Mr. Sabbe died of a "sud-den illness," which was not specified. A teacher in Ethiopia and an Eritrean nationalist early in his career, Mr. Sahbe fled Ethiopia in 1960 during a crackdown by Em-peror Haile Selassie's government against secessionist elements.

Comfort. Remember it? It's a word almost forgotten in the airline business today.

But not at Pan Am. You're going to hear more and more about comfort this year from us.

More comfort in First Class. More comfort in Clipper® Class. More comfort in Economy. You'll be in total comfort in our new Sleeperette® Seats in First Class. You'll be able to relax, stretch

out, and work if you want in our wider, more handsome Clipper seats (with six, not eight, seats across).

You'll be treated to new carpeting. brighter decor, better lighting, new electronic head sets and more elaborate and innovative menus.

There's more. We're also introducing an all new reservation system which means faster ticketing and shorter lines at the airport.

And as always you get that internationally famous Pan Am service everywhere you fly. So if you appreciate comfort, come fly with us. And get more.

# Her Grandchildren

#### The Associated Press

Page 6

LONDON - A South African woman is bearing in-vitro triplets belonging to her daughter and sonin-law, according to a British news-paper, The Mail on Sunday.

She is bearing the test-tube trip-lets because, during in-vitro fertilization, doctors fertilize and attempt to implant three or four eggs to increase the chances of a pregnancy. The newspaper said that in the South African case, three of the eggs had developed since they were planted three months ago.

The surrogate mother was identi-fied as Mrs. Raymond Anthony. 48, who had agreed to bear her own grandchildren when doctors said that her daughter and son-in-law, Alcino and Karen Ferreira-Jorge, were unable to have more children. The couple has one son.

The oewspaper said Mrs. Anthony underwent the in-vitro fertilizatioo in a Johannesburg clinic. The father's sperm and the mother's eggs were placed in a laboratory dish and the fertilized embryos were transplanted in her womb.

The newly-revealed Titian, after cleaning.

# <sup>\*</sup>The Restoration **Of a True Titian**

By John Russell New York Times Service NEW YORK — After cleaning and restoration at the Metro-

politan Museum in New York and intensive research hy a Met cura-tor, a large painting attributed simply to "Workshop of Titian" is now attributed to the great Venetian master himself.

Aside from an increase in value of "The Madonna and Child, with Female Saint and the Infant John the Baptist" from about \$50,000 to millions of dollars, the process of discovery and authentication provides fresh insights into one of history's greatest artists.

. Last June the Kimbell Art Museum in Fort Worth, Texas, bought a painting that had been sold at Sotheby's in London in April 1986 for around \$50,000.

The picture is a variant of a Titian in the National Gallery in London. Given the tentative attribution, its dirty and disfigured condition and the lack of evidence in the catalog about previous ownership or published references, the picture passed virtually unnoticed at auction

Labeled flatly a Titian, it is on loan to the Met and can be seen through April 26. It will then be sent to Fort Worth, Because it is painted not on canvas but on three horizontal panels of poplar wood, it is not likely to be lent again. "I liked the look of it in the

catalog," the director of the Kimbell, Dr. Edmond P. Pillsbury, said. "But it wasn't convenient for me to go to London at that time, and to have done the right amount of research would have aroused too much attention."

nent (h

Among those who did see the picture in the salesroom was Piero Corsini, a much respected Old Master dealer in New York. In an interview, he told this story:

"The picture said 'Titian' to me. But it was hung high, and I didn't want to arouse notice by asking for

ing. Dr. Pillshury came to see it, and he asked if I would consider selling it to the Kimbell, and I said I would. He agreed to pay me \$1.5 million in three annual installments. It was a bargain for him, but then it had been a bargain for me. I hope that something like it will happen to me again one day. "What I feel about it is that,

although it is not quite so beautiful as the one in the National Gallery in London. it is in a way more artistic, more revealing. It shows Titian struggling to get it right, try-ing this and that, changing his mind. For me, he is right there in the picture."

The X-ray was decisive. It revealed that on the left of the painting the Madonna was initially intended to be taking a flower from the hand of one of Titian's heftier young angels. "It was obvious from the X-rays." Christiansen said. "that the angel was never carried to any degree of completion but was painted over as dense shruhbery and a finch."

On the right side, where foliage initially followed the configuration of a hush that appears in the London painting. Titian reinvented the composition by putting in the in-fant John the Baptist as a sturdy upstanding little boy with a lamh in tow. Assistants would never have been asked to carry out such radical changes when the painting was already so far along, and the quality of the new material was such that could only be by Titian himself. Elegant compositional refine-

ments - notably the white cloth on the lap of the Virgin that serves, as Christiansen puts it, "as a foil for the soft, rounded forms of the Child" - are further evidence of

the care with which Titian revised and refined his ideas. It is also relevant that, after Titian had completed both the landscape and the sky, he painted in a complete tall

tree in the middle distance in a way that would never have been left to sistant. As seen in the Met with two of the museum's own Titians beside it, the Kimbell painting makes an effect of immediacy and sumptuosness that is owed primarily, in Brealey's view, to the use of wood instead of canvas. "Wood is a smooth surface from the beginning," he said. "If you add gesso it gets smoother still. And so it bounces the light back in a way that else would see it. I didn't sleep, Naturally, I could not bid myself. on linen. That is why the Kimbell picture has such luminosity. "Of course, the picture has lost a sit near her, and she would bid. lot, too. The draperies of the knceling saint have quite gone, really, thanks to irreversible fading, and so their modeling now looks quite insubstantial and they don't line up ed values. The Madonna's blue cloak has very much darkened, too. thanks to Titian's use of an azurite hlue." So this is not --- nor could it be -breatey cleaned the picture, and everyone was very pleased, and Ev-erett Fahy, who is now bead of European paintings at the Met, told Edmund Pillsbury in passing that they had a wonderful new Ti-tion in their encountrion studies. ing. He knows his way around 11's the background on a Joachim lives in the house. He hates the less than an hour's drive from Das- Kuhn album. word engineer as much as Renker

By Mike Zwerin seldorf and central to Amsterdam, ERKALL, West Germany L Kurt Renker built a basement Brussels, Paris and Frankfurt, After recording the Philip Catherine-Charlie Mariano-Jasper Van't Hof studio for musicians who cannot afford to build one of their own trio's "Sleep My Love," he decided And it's not even in the basement. At the age of 16, he dropped out to build a \$500,000 studio in the school in Duren, where he grew empty house his father owned near up, 15 miles from this village in the Eiffel Mountains. His industrialist Renkerstrasse.

The musicians record in the livfather had already "provided me with enough education so that I knew not to go into his business." intimidated by seeing all that high-tech hardware and there's nobody He worked in a bookstore, joined a jazz club, mei musicians, booked an Eberhard Weber concert. When staring at them. A cat is asleep on and bassist with Cream is ready for a promoter failed to pay Jeremy Steig, Eddie Gomez and Joe Chamthe sola. There's a toaster in the bers, Renker recorded them so they could get back home. "Once you start this sort of thing," he said. "it builds on its own." werdubbed by remote control sit-

ting on the terrace. Renker, 28, is a new sort of art patron. Ten years ago, using money

given him hy his father, he hooked was built, David Liebman. Richie up with Walter Quintus, an engi-neer, to form CMP (Creative Music Beirach, John Bergamo, Mark Productions), a record company specializing in jazz-oriented new to understand. CPM's eight albums keeps running. We may get 10 music. Such music is unlikely to are now distributed in 10 countries. pay off fast, if at all.

Renker grew up around here, superior sound, although nothing up, curyer is the superior sound although nothing time. All we risk is tape. Nobody's Farm country. There are rolling has been soundproofed and there's time. All we risk is tape. Nobody's watching the clock." no air conditioning. Flies have dis- watching the clock." hills, lakes. You can walk for hours without seeing another human be- turbed takes. Birds can be beard in

Renker and the people who record for CPM have in common

with someone he doesn't get along with even if he likes the music. There are no contracts, and he tells them, "If you can get a better deal somewhere else, go get iL"

There is room for three guests in ing room. Cables connect the mi-trophones to a 32-track digital con-stay in Renker's modern home hidtrol room upstairs, so they are not den on a hill up the road in Nideggen. Jack Bruce was there for a week last month. The former singer a comeback. Renker calls Bruce's corner. Large windows overlook a record "CPM's first really big prowooded valley. They have also re-corded in the kitchen, the toilet, the company, fine, we all get paid; if guest room, and a guitarist once not we'll release it ourselves."

The clean-cut Renker looks like he might be an astronaut. He of risking tape if Kuhn or Liebman speaks lightly accented declarative want to try out new material. In the two years since the studio speaks lightly accented declarative sentences in American English. "We invite musicians to play when Nauseef and others have recorded the studio is free. No guarantees esoteric music listeners must work either way. The tape recorder just hours of material. We edit it down. Several reviewers have praised the If everybody likes it, we'll put it out. Anyway we've had a good

Ouintus, who is also a violinist, know what time of day it is.

word engineer as much as Renker hates the word producer t"we just

work together"1 and many of the mutual respect. He will not work jazz musicians on their label hate the word jazz. David Liebman savs he'd never have been able to do his solo saxonhone album "Lonelinese of a Long Distance Runner." without Quintus, whose "creative use of effects in the mix enhances the album's programmatic content." and the pianist Kuhn told Keyboard magazine: "Walter is not an engi-

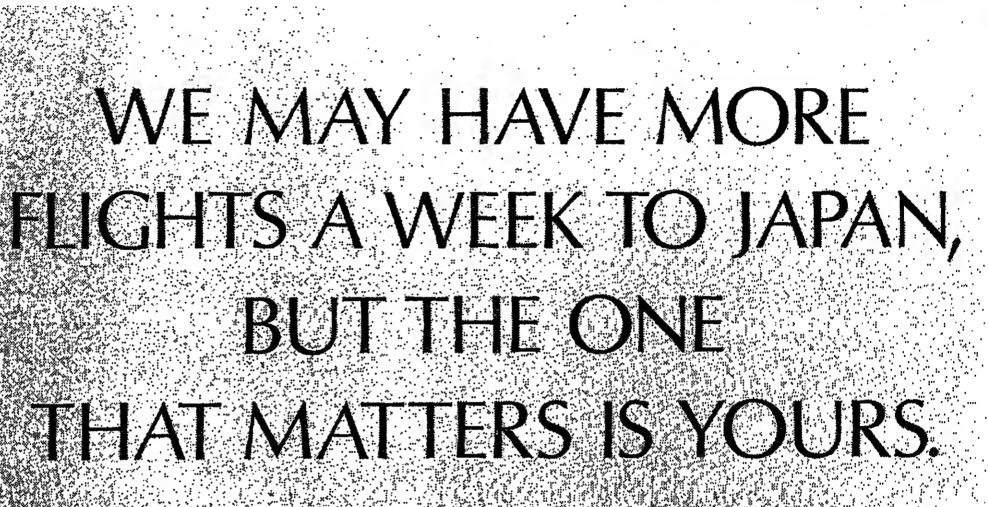

neer. He's part of the music. Last year Quintus worked with Channel Five, a rock band from Hamburg, which rented the studio off and on for five months. The project did not interest Renker. When something like that happens, he takes care of business or visits his retired parents in New Zealand. And the income pays for the luxury

Renker prefers to work from morning to evening. Recording musicians generally prefer the reverse. But he points outside to the mountain and says: "In most studios you never see daylight anyway. In a city it's easier to move around at night. it's quieter. people disturh you less. Here nobody disturbs you anyway and you always

# **Energy From Moscow**

Gorbachev's reforms, this is one of the most telling: He has made his country exciting. It is true, of course, that what would be unworthy of note in Paris, Rio or Tokyo is stunning when coming from Moscow. Soviet life has been that sluggish. Yet this is more than mere stirring from the dormant. There is energy coming from the Soviet Union, and it has the world intrigued.

Page 8

The energy animates the Soviet poet who describes publishing plans he could not have dreamed of three years ago. It stirs the Russian journalist to share an unaccustomed collegial joke. ("What does a cabinet minister have in common with a fly? Both can be squashed by a newspaper.") ft causes an American arms negotiator to confide that his new counterparts are "just an entirely different breed."

What have the reforms meant to a Soviet newspaper editor? One answered: "Before. I always asked and was told what I could print. Now they say, you decide. So I print it and then I come to work the cext morning wondering who's going to call.

The change brings Soviet filmmakers to Hollywood, there to hear U.S. counterparts confess: "The truth is, we've outstereotyped you." It brings out of the past poems that ring with long-buried injustices, films and plays that speak long-denied truths. It

Of all the things to be said of Mikhail makes East Europeans snatch up Russian newspapers. It makes the speeches of Soviet leaders readable. It makes old reporters pine to be in Moscow, and business people think about the market in Kiey.

> The reforms bring Western Jewish leaders to Moscow to talk of increasing emigration. The reforms bring out of prison and out of exile men and women who work for the release of hundreds more.

The reforms bring to print in Moscow the words of émigres whose names had been erased like those of disgraced relatives and debate over how warmly dissidents, notably Andrei Sakharov, should embrace the changes and their author.

The energy also generates Western de-bate. One commentator is held to be blind to the depth of the change, another taken in by window dressing. This scholar points to latent opposition within the Soviet Communist Party; a second points to the bureaucrats. All this opposition talk is itself a ruse, says one observer. Indeed no, responds another: If Mr. Gorbachev goes on at this rate, he will not last four years. How will it be for the West if he succeeds? ask some. How will it be if he fails? ask others. All these questions, all this energy, all coming from a gray, leaden, predictable, controlled Soviet Union. Amazing. - THE NEW YORK TIMES.

# Middle East Conference?

Jimmy Carter came to Washington last week to beat the drums for an international conference on the Arab-Israeli dispute. It is a widely discussed idea for reviving progress toward peace — a process which surged ahead while Mr. Carter was president and has gone nowhere in the Reagan years. President Carter sees a conference as something with merit in its own right and with appeal to an incumbent president who is presumably eager to record a visible dip-lomatic achievement and, in the Middle East, to move beyond Iran.

What is the argument for such an international conference? It is that the Arabs and Israelis cannot make peace directly. The Arabs resist following Egypt's state-tostate example lest once again stateless Palestinians end up left out of the play. As their price for entering the direct talks that Israel wants, they demand that talks be set in the context of a conference. The conference they seek, incloding Americans, Soviets. British, French and Chinese, would be empowered to deal with differences that arose in direct Arab-Israeli talks.

Israel is of two minds - that is, it is stalemated - about the conference. The Likud side is opposed to the territorial compromise demanded in return for peace, and it rejects the idea of a conference for fear that it would merely be a oew forum to gang up oo Israel. The Labor side is ready for territorial compromise and open to a conference, if Israel can enforce certain participatioo standards: to win compromises from the Soviets on the one hand and to exclude the PLO oo the other. Labor.

meanwhile, being no less fearful than Likud of being ganged up on, wants a conference to be not a court of appeals but merely the occasion to begin direct talks.

This account of the impediments is abbreviated, but it conveys why the prospect of such a conference is an improbability. Its adherent himself, Jimmy Carter, concedes that convening such a conference would be difficult, bolding it together would be difficult and producing results would be difficult. A lame duck president who already has his hands full could not be sold this project on the basis that it is a promising diplomatic tonic, or for that matter on the basis that otherwise the Middle East will explode. The Middle East will grind along. For all its other turmoil and disaster, however, the Middle East is a region primed

for serious diplomatic re-engagement by the United States. Mr. Carter pushes for an early conference opening. That seems to us far from urgent and far from being the single option available. And even though the Reagan administratioo is now said to be cautiously exploring the idea, it has had enough experience in unprepared or illadvised conferences by oow to know that a big, failed meeting would be worse than oone at all --- much worse. What people in the United States and in the Middle East need to see is not that the administration is ready to buy the option that Mr. Carter favors, but rather that it has some energy and ideas of its own oo resolving the terri-bly bloody tensions in the Middle East that it has oot just let the whole thing slide. - THE WASHINGTON POST.

# **Gorbachev Impresses Some; Others Are Worried**

### Moscow Talks About a 'Transitional Era'

S OVIET leaders think the West has entered a "transitional era" of "ad-vancement from capitalism to communism." They see declining Western military strength, and growth of the Soviet Union's colonial empire, as proof. It is never easy to know when one historical epoch ends and another begins. It is time, however, to think about it. The question has compelling implications for an administration and Congress that continue to accept trade policies that do not secure a fair deal for American products, and foreign aid programs that have only a remote relation to U.S. national security. Presumably, there will be serious discussion of these questions before November 1988.

-Jeane Kirkpatrick, writing in the Los Angeles Times.

**By James Reston** 

any optimistic that this part of arms rrme Minister Margaret Thatcher control can be negotiated and proba-has come back from a visit to Mos-cow gushing about her reception. It had given ber a "remarkable insight" On the other hand former from the start of arms On the other hand former from the start of arms and Mr. ther as med nor as bad as the experts any tangible progress, but she thought Mr. Gorbachev was eating up a bit on human rights. And she said, "I would that the Reagan administration is goimplicitly accept his word." Mrs. Kirkpatrick would not accept

his word, implicitly or explicitly. She compromise on intermediate-range wants acts, not words, and even then iles, the main nuclear and politishe would worry about the state of So you take your choice. America is the world. "Have we, almost without had a talk with Mr. Gorbachev in the either in the process of reaching the realizing it," she asks in a newspaper column, "arrived at the end of the post-World War II era and entered a bomb, or it is stumbling into a Gorbanew, far more dangerous period of international relations?

So thinks a former French foreign minister, Jean François-Poncet. So also, it appears, thinks Mrs. Kirkpatrick. She asks troubling questions: · Have American economic pow-

er and governmental anthority so eroded that the United States truly has lost the ability to hold its own in

the international sphere? · Does the Soviet Union under Mikhail Gorbachev really control the international agenda?

· Has the United States lost control of its own priorities to the new leadership of the Kremlin?

Kennan enunciated the policy. Mr. Lippmann gave the name to the era that resulted. Although nam and other misadventures, it would be tempt-

Shultz is not going to Moscow to dis-cuss Mr. Gorbachev's agenda for the elimination of intermediate-range nuclear missiles. Ronald Reagan set that agenda five years ago with precisely this proposal, which Mr. Gorbachev at first rejected and finally accepted un-der pressure from Washington.

It is not fair to the president to turn this agenda on its head. He may have been too stubborn at Reykjavik in defense of "star wars," but it was his 

The ironic truth is that these clumsy nuclear giants in Washington and Moscow need an agreement and cannot get away from one another.

Heaven knows they have tried. They almost wrecked the Joeland munit over the Daniloff affair. The Russians have tossed their women and their bugs into the U.S. Embassy in Moscow and Mr. Reagan has cast doubt on his own promises with the Iran-contra scandals.

But the talks go on, because it is better to talk than to fight. The administration, after solemn investigation. has discovered that young marines like women. It did not imagine that the power of sex would lead to treason. Maybe Jeane Kirkpatrick is right,

but when columnists write about "the end of an era" you can usually be sure the clan leader's real grievance was things will go on about the same.

Surely she goes too far. George The New York Times.

By Flora Lewis W ASHINGTON - Single issue foreign policy is bringing the same kind of trouble as single-inter-

est lobbies, and for a similar reason. People in America identify a specific cause, and in frustration set out to marshal all possible forces to advance it. Modern communications, and the soaring cost of political campaigns multiply the technique's effect on domestic issues. Global communication networks, which have vastly multiplied dependencies, seem to offer the same chance of results in deal-

ing with foreign countries. Americans feel that the United States has vast leverage, and it does. The great trade deficit means that America is providing the world's richest market to all whose hopes for prosperity rely on exports. U.S. aid is vital to scores of states even though, the United States is not nearly so generous in proportion to the wealth generous m proportion to the weath, it generates as are a oumber of small-er oations. Military power has tang-ble political impact even though it is not and seldom can be used.

So there is anger when all this. So there is anger when all mis, weight fails to make the world behave in the ways practically everybody ad-mits it should. It is tempting to think, that if the focus on a clear-cut path-lem is sharpened enough, the Unitst States could impose an honorable so. hution. But it is an illusion.

It is easy enough to set a priority. - fight drug trafficking, block the proliferation of ouclear weapons states, fight terrorism, contain communism, demand respect for human rights. All of these are important American goals. When the United States makes up its mind to pursue one of them, it can use pressure. The trouble is that the world is not . divided up by single issues but by nation-states, each with its own com-plex internal balances. The goals overlap and even contradict each other in the real societies with which the United States must deal, and American also be contradictory.

Pakistan is a prime example. To start with a simpler case than current concern over its effort to build an. atom bomb, there was a period last year when a tribal rebellion threatened in the north. Moscow was interested, and hinted that Islamabad had better come to terms quickly on Afghanistan in order to deal with it. But Pakistani officials found that not so much separatism as fury at

having his lucrative drug trade cut off by measures that the United States had demanded. The situation was eased by buying him off. Not pretty, but American aid must; also, serve.

American purposes. \_ The nuclear issue is more difficult.-Pakistan is going for a bomb, and some in the U.S. Congress insist that Amèrican la requiring an end to aid moless Pakistan halts its program should be implemented. But that would inevitably mean ending the

Section (dift of Survey 27. 1 2 aren - - -----. . . . 15 AT 8 -74E \$7800-00 <u>170</u> - 12 C --Ser Starting and as an one of the . n 1. mažy 🚧 18.99 -----

The first U.S. combat victim in seven years of civil war in El Salvador has died in a guerrilla raid in which more than 60 government soldiers also were killed. It was a conspicuous success for the guerrillas, militarily and, perhaps more, politically. Americans have tended to let the struggle in Nicaragua obscure the longer, harsher, deeper conflict in nearby El Salvador, and an incident such as the one at El Paraíso brings El Salvador back into focus.

The death of Staff Sergeant Gregory Fromus, a military adviser, seems to have been the chance result of an unusual largescale attack launched by the guerrilla command to show that it can still stay in the field against El Salvador's U.S.-equipped and U.S.-trained armed forces. What is notable, bowever, is not that one American was killed but that in seven years of providing aid and advice the United States has naged to stay in a support role and to do a fair job of helping Salvadorans better defend themselves. The prediction that the dispatch of a small number of advisers would lead inexorably to a Vietnam-like involvement has not come true.

The guerrillas, however, hang on, reduced but resourceful and determined to block the government's strategy of wearing them down and writing them out of El

Salvador's luture. Until oow, anyway, then assaults on military targets have been the lesser part of their activity. The greater part is their attacks on economic targets - coffee plantations, buses, electric pylons. These attacks have inflicted heartless damage on an already staggering economy (whose latest burden is a U.S. immigratioo reform that may close El Salvador's emigration safety valve). The attacks have angered many Salvadoran citizens, thereby further narrowing the opposition's political appeal, souring what prospects there are for a political settlement and prolonging the war.

President José Napoleón Duarte hangs on, too. His standing in Washington as the man who brought some political reforms ensures the flow of U.S. aid that supports the anti-Communist struggle. But his very success has had the effect of widening the political space in which ever sharper challenges to him are mounted across the legal political spectrum - including challenges from the part of the spectrum that is most suspicious of trying to negotiate a political settlement. This is how his situation can get better and worse at the same time. The fact is that democracy is essential to the salvation of El Salvador, but so is an end to the war that no one knows how to stop.

-THE WASHINGTON POST.

No End to This War

#### **Gorbachev** Plays to the Right

Ν

ŝ

Over the years, the Soviet Union has accorded a warm welcome to many Western visitors. But these have been the dupes, like Eleanor Roosevelt and Beatrice Webb, who caused no trouble. Margaret Thatcher did cause trouble. She told the Russian people unwelcome home truths on television. In spite of this undiplomatic behavior, her visit was a diplomatic and public triumph. Why did Mikhail Gorbachev lean so far over backward to avoid being provoked?

By all accounts Mr. Gorbachev is a very clever man; fully clever enough to understand that the only deals with the West that have any chance of meaning anything in the foreseeable future are those that have the support of the right. If he wants to do serious business with the West, it has to be along lines acceptable to right-wing opinion. Realistically speaking, the left does not count.

Needless to say, Mrs. Thatcher is not as powerful as Ronald Reagan. But in some ways she is more influential as the keeper of the conservative conscience. Before Irangate, this would not have been the case. As it is, she sim ply happens to be the most important right-wing leader around, whose good will could be crucial to the success of Russian diplomacy in the next few years. - The Sunday Telegraph (London).

Union. The two key debaters were intellectual giants. Arguing what might be called the hard line was George F. Kennan, then 43, chairman of the State Department's policy planning council, a talented and experienced diplomat who had already, despite his relative youth, become a wise man" adviser to America's leadership.

WASHINGTON — The main foreign policy issue in America in the summer of 1947, the second summer after World War II ended,

was, as it is today, how to deal with the Soviet

Under the pseudonym X, he detailed in the July 1947 issue of the Foreign Affairs what came to be known as the policy of cootainment. Amer-ica, wrote X, should "confront the Russians with unalterable counterforce at every point where they show signs of encroaching upon the interests of a peaceful and stable world."

Taking the more conciliatory side was Walter Lippmann, 58, long established as the country's premier political commentator. Mr. Lippmann argued that rather than oppose the spread of communism, Western policy should be based on making the leaders in the Kremlin feel less threatened: then they would withdraw their forces from the East European satellites. America, he argued, could ill afford the economic or moral costs of trying to contain communism's encroachments where on the periphery of the Soviet empire. Mr. Lippmann wrote 14 columns rebuilting Mr. Kennan for The New York Herald Tribune,

and they were collected in a book, "The Cold

Foreign Affairs was the most important of for the discussion of foreign policy, not a word of Mr. Lippmann's argument appeared in it.

Kennans and Lippmanns Are Allowed to Debate

By Stuart H. Loory

War: A Study in U.S. Foreign Policy." Mr.

The editor, Hamilton Fish Armstrong, had banned Mr. Lippmann and his name - for a personal reason. Until June 1937, Mr. Lippmann had been a regular cootributor. Indeed, Mr. Armstrong and Mr. Lippmann had been the best of friends. Then Mr. Lippmann and Mr. Armstrong's wife, Helen, fell in love.

The affair was classic. It began with a romantic dinner in the Rainbow Room atop Radio City where the formal and reserved columnist dances with his friend's wife to tunes from a Fred Astaire-Ginger Rogers musical. The affair was discovered when four Lippmann letters to Mrs. Armstrong were mistakenly forwarded to her husband by a hotel clerk in the Austrian Alps.

The man who served as arbiter of morality among nations (he had drafted eight of Woodrow Wilson's 14 points) was now in a moral dilemma. Finally, with feelings of guilt toward his wife and his best friend, he went through a divorce, as did Helen Amstrong. They married in 1938. Mr. Lippmann's biographer, Ronald Steel,

says that Mr. Lippmann became a better colum-

ing to argue that had Mr. Liotmann and arguments not been banished from Foreign Affairs, some of that would have been avoided. Tempting, but not so. Mr. Kennan came to

nist for the affair, which reignited a sense of excitement not only in his personal life but also in the political affairs of the world. Because Mr.

Kennan's article soon became the intellectual

underpinning for America's involvement in Viet-

realize that he had overstated his case, and he became one of the severest critics of containment. Mr. Lippmann's conciliatory arguments were depreciated by the Soviet tzkcover of Czechoslovakia in 1948, less than a year after his columns appeared; indeed, for a time in the '60s he was among the most outspoken supporters of President Johnson's Vietnam policies.

On this 40th anniversary of the X article, the spring issue of Foreign Affairs includes commemorative articles, including the one by X. The issue posthumously restores Mr. Lippmann to the jour-nal's pages with excerpts from his 1947 critique.

Some might agne that Mr. Lippmann's exch-sion paralleled censorship in Soviet journals. That is specious. One establishment journal was closed to him, but he could be seen in many other outlets. By reprinting him now, that journal reminds us that debate cannot be stifled in America.

The writer, a correspondent of Cable News Network, contributed this to The New York Times

El Salvador: The Rebels Prove They Are Still There

Harvey R. Sorkow, a judge in the Supe-rior Court of New Jersey, called Mary Beth Whitehead manipulative and ex-

#### ON MY MIND

ploitive. This is character assassination from the bench. It was an attempt to manipulate opinion against her. It exploited the judge's position on the bench. The judge performed one public ser-vice. He brought out for the whole world to see what lawyers talk about

only behind the hand. There are judges known for their nas-titiess, for embarrassing lawyers for the pleasure of it, haranguing defendants, using their authority to terrorize courtrooms. Usually, only people in the courtroom know because most trials set no public attention

The lawyers know they may be appearing before that judge again one day. So they swallow it, and judges who humiliate the helpless before them get

away with it. Their arrogance grows. In the courtroom, Judge Sorkow made his distaste for Mrs. Whitehead plain. Ruling against her was one thing, but he used the power of the bench as a brand against her. She was 2 party in a custody case, not a criminal He should not have added public bumiliation to personal loss.

Even lawyers not opposed to surrogacy were startled by the construction of the judge's decision. He said that the surrogacy contract was totally valid, without dealing with a central issue: Contract laws never envisioned surrogacy mother-hood. Can they be extended to cover it without appropriate legislation?

At the same time, the judge insisted that the key to the case was the welfare

#### Protect the Gift of Surrogacy

the

There is a good ethical argument in favor of 2 woman's right to have 2 baby for someone else. It has probably gone on privately for centuries --- sisters have had babies for each other, and so have close friends. It is in the nature of the "gift relationship," done by one person for the benefit of another or others. When trust prevails on all sides, rather than contracts and cash on the table, a surrogate mother can confer the greatest of benefits on a childless couple. Let nobody stop her.

- Rabbi Julia Neuberger, writing in The Sunday Times (London).

ONNL HERA

N EW YORK — The case of Baby M of the baby. If that were so, there was no need to rule on the contract.

If there was not much logic, there was plenty of motive. The judge not only wanted to give the father and his wife custody but to refuse Mrs. Whitehead visitation rights - to "terminate" her. Under the law he would have had to have found that she had abused or abandoned the baby, which he could not do. He decided that the surrogacy contract provided for termination and was legal. He turned the baby over to the father, terminated Mrs. Whitehead and

then played his ace. He called William and Elizabeth Stern into his chambers and within minutes rammed through an adoption process that normally takes weeks or months. The purpose plainly was to make Mrs. Whitehead's position even more difficult. Mrs. Whitehead's lawyer says he was not even informed of what

was going on in the judge's chambers. Appeals judges will find little in the record on an issue that might have undercut the judge's elegant philosophy that a "deal is a deal" no matter what. That issue is the changes in a woman's body and mind during pregnancy that bind her to the baby and could make any

prenatal agreement to give the baby away suddenly horrifying. The defense counsel says the judge would not permit expert opinion on that subject. A surrogate mother, like a pregnant

woman planning to give up a child for adoption, should be allowed a grace period to change her mind. That might cause sorrow to the father,

which could be somewhat assuaged with shared custody - not the cruel cutoff that Judge Sorkow ruled that Mrs. Whitehead must endure forever. That would mean that fathers in surrogacy could also demand a grace period. Fine, provided they assumed financial responsibility. Few rich women become surrogate mothers. Escape clauses would make both mother and father far more cautious about the idea. That is exactly the point. In the absence of legislation, the judge should have said that in decency he was

unable to make a drastic decision. He could have ordered some form of shared custody until the law was made clear. Not a perfect solution but better than validating a contract about human destinies in absence of guidance from society. And better than rending the mother forever from the baby, and then slapping her across the face with denunciation.

Mrs. Whitehead descended into a public hell of exposure and bumiliation to try to keep her child. This forced us all to face surrogate motherhood as an issue that touched our own beliefs and souls, For that she deserved respect, perhaps even a touch of gratitude, certainly not a judge's vilification. The New York Times.

### LETTERS TO THE EDITOR

#### Whatevergate: Nothing to Be Worried About After All

For a while I was worried. I feared that the Tower commission might force Americans to confront some uncomfortable questions, such as: Why, if U.S. have made it into print. foreign policy goals are moral, must the executors of the policies construct a labyrinth of lies to cover their activities? What is there about the perceived critical faculties and attention span of Americans that emboldened Messrs. Reagan, Regan, Casey, North, Poinshooting the messenger. dexter and McFarlane to carry on?

But the commission did not fall into the trap. It saw the scandal as an unfortunate but largely localized foul-up caused by two zealots (North and Poindexter), faulty management (Regan) and a good president betrayed by his big heart.

The problem has been solved cleanly and swiftly. The patient will be back to normal in no time. Let the self-congratulation and memoir writing begin. THOMAS S. HARRINGTON.

Madrid. I agree with the New York Times editorial "Privatized Diplomacy" (Feb. 9), which asked: "Where in the United States Constitution is it written that the president can go to foreign governments to evade the congressional power of the purse? Where is it written that he can franchise war-making powers without the slightest consultation?" Let's put democracy back into action and call undeclared

wars unconstitutional. DONNA KELSO. Lausanne, Switzerland, After reading it called Irangate, Con-

Graz, Austria.

#### **Presidential Manners**

I was appalled to see on the front page of your March 24 issue a photograph of President François Mitterrand talking to Prime Minister Margaret Thatcher, with one hand in his pocket and the other pointing a finger at her. There was a time when French manners were considered to be the bast in the world. What has happened to them? L.E. ALLWOOD.

Le Château d'Oléron, France,

### More on Preachers, Please

Please continue full reporting on the television preachers' battle. My favorite quote so far, reported in your March 26 issue, is Oral Roberts's remark from his Tulsa, Oklahoma, "prayer tower": "You are sowing discord among the brethren because somehow you think you're bolier When William F. Buckley Jr. writes than thou." Art Buchwald faces competition from unexpected quarters. CHARLES BOGGS. Paris.

dressed than 1 held a plastic cup. I as-sumed its purpose was to hold coins and not to hold his coffee. "God bless you, my man," he said, in one of the cheeriest

Page 9

greetings I ever received in my life. At 57th and Broadway, an intense dark-haired man held a can and sang what I took in be an operatic number. He held the cup like a make-believe microphnne, nnt something to receive coins in. He wasn't making anything. And I have run across several women holding young children and asking for alms. I suspect that some have borrowed the kids to use as shills. But a deal is

a deal. I give them quarters. After I dropped off my kids at school the other day, a young man began mus-cling his way toward the entrance. "I got to use the bathroom," he said. My deal is to hand out quarters, not open doors in my kids school for strangers off the street. "Look," I said, "you're going to get in lots of trouble if you try to go in there." 'Yeah, well, they ain't got any bathrooms in this city for people who need them." He had a Southern accent somewhat like mine. "They got a bathroom in there. Get out of my way.

"Sorry," I said, "but you'll just have the police on you if you keep this up. Here," I slipped him a buck. "Try the coffee shop on the corner."

You really want to help me? Then tell me where I can get a jnb. I can lay a roof. throw up Sheetrock, do plumhing, electricity and put in tile. I ain't no hum." But in the current definition of the term, he was. He may not have been a burn, but he looked like a burn. In New York, image is everything, "Get cleaned up," I said, "Then go down to Houston Street early in the morning and check one of those employment agencies. They hire temporary construction workers there." He looked at me as if I might be crazy myself, "Houston Street! No way, They just work you to death and pay you

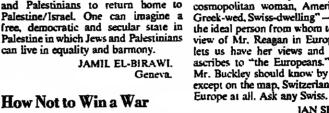

peanuts. That ain't no help." "You ask, I tell, Where you from?" "I don't feel like talking about it. You got something to say to help. I'll listen." "One thing I can tell you is that no one's going to be inclined to help you if

you start off being so ornery. "Ha! Don't you see, man? I don't wan

advice. I want a goddamn job." He turned on his heels as I turned on mine. I was thankful the coffee house on the corner was about to inherit him and his problems. I had fulfilled my bargain with myself: Make contact with a person, not with a statistic. Whether that person says God bless you or damn you.

The author of this column was a Paris Herald editorial staffer from 1929 to 1933, when he returned to the States to rejoin the Baltimore Sun. He has published many short stories, essays and novels and today, in retirement, continues to contribute to the Sun's edisorial page

By R.P. Harriss

A super-deluxe tour of France in the spring of 1931, with 25 American mayors and their wives, was the cushiest (and most hilarious) reporting assignment I had during my years on the old Herald

French patriotism and promotion sparked the 25day tour, which probably needs a bit of explaining.

After Lindbergh's cpochal transatlantic flight in 1927, two French aviarors, Francis Costes and Maurice Bellonte, made the first Paris-New York hop in 1930 and then barnstormed through 25 American cities. To reciprocate for the American hospitality shown to the fliers, the French government invited the host mayots and their wives on a 25-day tour of France, ending in Paris.

What a terrific idea! The French banked on its bolstering transatlantic tourism. They also thought it might belp lead to the tepcal of Ptohibition. thereby opening up the American matket to French wines.

But from the starr it backfired.

Disembarking from their luxury liner, the mayors received their first official welcome at Le Havre's elegant City Hall, with its mayor, in morning coat and striped trousers, proposing a toast with champagne "to Franco-Ameri-

can amity." Whereupon the elderly mayor of Los Angeles, an ardent prohibitionist, ex-pressed outrage. "That's wine," he protested. "Illegal!"

#### **Chase Hit** In Taiwan, Everything That By Loans Goes Up, Keeps Going Up **To Brazil** By PATRICK L. SMITH International Kerald Tribune

AIPEI — Everyone who watches this small, hyperactive market has been asking the same question of late: When will the current rally end? Since the beginning of the year, the Taiwan Stock Exchange index has headed toward heaven as if Chuck Yeager, the high-altitude test pilot,

were somehow at the controls. No nosebleeds have been reported. But the market's 42 percent rise over the past three months has generated broad expectations

of a pause - and even a desire for one among some analysis.

"The market looks good in the very short term and in the long term," said Blair C. Pickerell, general manager of Jardine Fleming Taiwan Ltd. "But there has to be a correction some-

where in the middle distance." Everything that goes up must eventually come down, Mr. Pickerell and other analysts reason, especially when the ascent is as rapid as it has been here. But that old adage

and the second s

entli

121

All the factors that have driven this market to seven straight months of record highs are still in place. Output is expected to expand by 8 percent this year, spring earnings reports have been excellent, and with a current price-to-earnings ratio of about 15, the market is far from overpriced.

More to the point, speculative funds have poured into Taiwan since the new Taiwan dollar began appreciating against the U.S. currency last year, causing an explosive growth in foreign re-serves. And while the national savings rate is now 38 percent, interest rates are at record lows.

Awash with cash, banks are refusing to take deposits. The only places to put the stuff are the stock market and real estate, which, as one economist said, has been a "dead investment" for years.

Because the market is driven by excess liquidity, analysts say the stabilization of the exchange rate and the expected removal of exchange controls will determine the extent of a correction when it comes.

The market, which was closed Monday, ended a half-day session Saturday at 1,461.79, a fall of 16.87 points. Turnover was 5.94 billion new Taiwan dollars (\$173.6 million) — not a record

but still a level unheard-of only a year ago. All of the funds through which foreigners are permitted to invest here are backing slightly away from the standard menu of export-oriented stocks.

Looking at the currency and reserve situations, we're convinced that the economy will be domestically led over the next few years," said Danny Chan, an executive from Fidelity International Investment Management who runs the \$25 million Taiwan Fund.

This has led Mr. Chan's fund and the three others like it into such sectors as construction, plastics, foods, cement and chemi-

The Taiwan Fund and the Formosa Fund, which is managed by Hoare Govett, the British stockbrökerage, are pacing the pack. The more sluggish performer — which is still up 32 percent from last May — is the Taiwan (R:O.C.) Fund, largest of the four.

Shares in the funds are difficult to acquire. The only one readily available to newcomers is the Taiwan Fund, which is traded on the American Stock Exchange. Its shares opened in December at \$12.18 and shot to \$39 before

settling at \$32 or so. That is still a premium of nearly 200 percent

All the factors that have driven the market to seven months of record highs are still there.

**On Nonaccrual** Reugen NEW YORK - Chase Manhattan Corp. said Monday that it was placing \$2.3 billion of mediumand long-term loans to borrowers in Brazil on nonaccrual status because of uncertainty about the resumption of interest payments. The

\$2.3 Billion Put

action means Chase is essentially declaring the loans delinquent. The action, retroactive to Jan. 1, will reduce first-quarter net income by about \$31 million, Chase said.

This amount includes the reversal of interest accrued in 1986 but not yet collected. Chase estimated that if no inter-

est payments were made on these loans during the rest of 1987, the after-tax impact for 1987 would be about \$120 million based on current interest rates.

Chase had net income of \$143.7 million in the first quarter of 1986. Full year net income was \$585.4 million.

Last week, five of the largest U.S. bank groups designated as delin-quent a total of about \$6 billion of oans to Brazil, which has suspended interest payments on foreign commercial debt.

Now, however, Phillips, the dominating presence in this community of 36,000 just north of Tulsa, is not only alive but slowly The banks, in placing the loans on nonaccrual status, or cash basis, will now account for interest paystaging a comeback. ments only when they arrive, rather than when they are due.

Under U.S. banking law, banks must place loans on nonaccrual if payments of interest are past due 90 days or more Chase noted Monday that inter-

est payments on many of the loans it was listing would not actually become past due by 90 days until the second and third quarters of

However, in light of uncertainty See CHASE, Page 13

Pilots, Citing Takeover Fears, Offer \$4.5 Billion for United

By Calvin Sims New York Times Service NEW YORK - The pilots' shares outstanding. In the letter, Mr. Duhinsky said union of United Airlines, which has been at odds with management the union was making the offer as a for some time, has made an offer to buy United from Allegis Corp. for \$4.5 billion in cash, subordinated result of rumors that United might be a potential takeover target.

There was no immediate renotes and assumed deht. sponse from Allegis. [In Chicago, UAL Inc. said The union said Sunday in a letter to Richard J. Ferris, chairman and

# **BUSINESS ROUNDUP**

# **Swedish Investment Firms to Merge** By Juris Kaza

to the Herald Tribuo

STOCKHOLM - The Swedish investment company Argentus made a 3.2 billion kronor (\$505 million) cash hid Mooday for Beijer, another investment company, in one of the largest offers in ecent Swedish history.

An analyst at a prominent Stockholm brokerage said the transac-tion, was "a perfectly natural step" to consolidate two companies controlled by the financier Anders Wall.

Under the terms, Argentus, tax status of an operating company which already owns 30 percent of Beijer, will fully acquire the compa-president and chief executive offiny for 230 kronor per share and change its own name to Beijer.

The offer represents a premium of 28 percent over the market value of Beijer shares last Thursday, before both companies requested temporary suspension from trading ahead of the merger announce-ment. Holders of Beijer warrants will be offered 126 kronor cash.

The new company will have the

Gencorp to Buy Own Shares, Sell Original Tire Business active role by Anders Wall," the RKO operations would gain \$1.4 Stockholm analyst said. He ooted

The Associated Press AKRON. Ohio - Gencorp Inc., fighting a \$2.45 billion takeover bid, announced a stock buyhack Monday and plans to sell some subsidiaries, including the tire business that started the company more than 70 years ago. Gencorp announced it would re-

purchase 54 percent of its 22.3 milhon shares outstanding for \$130 a share, or a total of about \$1.57 billion. General Partners, the investment partnership that has been trying to buy the company, has offered \$110 a share for the 90 percent of Gencorp it doesn't aljeady own. The restructuring includes im-mediate stops to sell Gencorp's tire

operations and the RKO subsidiary's bottling operations, focusing the corporation on defense and aerospace and original automotive

The sale of General Tire and the

billion, which would be used to that Mr. Wall had spent recent finance the buyhack, the company In trading Monday on the New York Stock Exchange, Gencorp stock rose \$3 a share to close at \$118.

Gencorp began in 1915 as Gen-eral Tire & Rubber Co.

General Partners, a partnership consisting of a Midland, Texas-based oil and gas producer, Wag-ner & Brown, and the Irvine, Caliprominent Swedish businessmen. The issue was made before the company's anti-smoking chewing fornia-based glass maker, AFG gum became a major success, and Industries Inc., began a hostile ofmany recipients of the shares made fer for Gencorp in March. Last week the partnership raised the ofquired by Pharmacia. fer to \$110 a share, or \$2.45 billion.

The stock buyback offer announced Monday does not require a minimum oumber of shares to he tendered. Once the buyback is completed, Gencorp would remain publicly owned.

Advance After TFI Is Awarded cer and Hans-Eric Ovin as chairman of the board, "The position of investment PARIS - Shares of the French construction group Bouygues SA jumped 6.13 per-cent in Monday morning trad-ing on the Bourse, the day after companies in the Swedish stock market has weakened successive-

Mr. Wall remarked. "A merger Argentus and Beijer creates powerful combination of forces" Among the industrial companies held by Beijer are Calmar, a maker of pumps and spray devices, and Kebo, a maker of laboratory equip-

in 15 countries.

Bouygues was quoted at 1,540 francs (\$254.80) in early will have annual sales of around 4 billion rading against Friday's close of billion kronor and 4,000 employees 1,451. The shares subsided later Monday to close at 1,485 "The other interesting aspect is rancs.

The Supervisory Board of Banque de Gestion Privée-SIB met on Thursday 19, 1987 with Mr. Gerard Eskenazi as chairman. The purpose of that meeting was to exami;ne the fiscal year 1986 results closed by the Board of Management presided over hy Mr. Guv de Mailly Nesle, before their submission lor approval to the Annual Meeting of Shareholders.

Let's recall that BGP and SIB merged on December 8, 1986 with effect as of January 1, 1986. The new bank was renamed Banque de Cestion Privée-SIB. The Board approved the results as of December 31, 1986, which was the first fiscal year of the new company.

Net profit after depreciation, reserves and taxes amounts to F.F. 81,065,526.97, representing a 44.3 percent increase over the cumulated net profits of both banks at the end of fiscal year 1985. The final result of the balance sheet amounts to F.F. 8,380,514,000 as of December 31, 1986 against F.F. 5,932,740,000 at the end of the previous fiscal year.

Shareholders equity before taxes has strongly increased from F.F. 231.438,000 before the merger to F.F. 507,689,000 as of December 31 1996

Portfolios of securities also have gone up from F.F. 7,653,300,000 to F.F. 10,501,300,000 and new products (FCP-SICAV) have been developed and sold

The merger, the adoption of new headquarters and the moving of the personnal into new offices were all major developments for the bank in 1986. It must be pointed out that these developments have had no negative effects on the activities of the bank, and that in addition the complementary nature of both companies has led to a considerable synergy in many fields of activities.

The new size of the bank, the strengthening of its financial and human structure, its belonging to a first class international group -Pargese-GBL - and the quality of its shareholders allow us to forecast major qualitative and quantitative developments in all the traditional fields of activities of the new company as well as in areas and markets where it intends to play a major role.

United States, Britain, France, Japan, Italy, West Germany and Canada. The market's attention focused

on the Washington meetings as no major U.S. economic indicators are due this week. Treasury Secretary James A.

Baker 3d said Sunday that the drop Board chairman, Paul A. Volcker, sions were sure to be discussed at

146 yen, the level at which it closed down slightly from 146.05 Friday. In earlier European trading, the for nearly two years, dealers and analysts said. The price of British pound rose in London to \$1.6185 from Friday's \$1.6145; in silver bullion was fixed at \$6.4990 an ounce in London on Frankfurt, the dollar was fixed at Monday morning, the highest level since late May 1985. 1.8243 DM, up from 1.8162 Fri-day; in Zurich, the dollar closed at In the afternoon, silver trad .5190 Swiss francs, up from ed a little lower in London, at 1.5132; in Paris, at 6.0703 French francs, up from 6.0440.

\$6.47. On the Commodity Ex Dealers in Europe said there had change in New York on Moneen few transactions. They said day, silver for May delivery closed at \$6.58 an ounce, up 13 the dollar's resilience probably could be explained by a few short cents.

position squarings prior to the Group of Seven meeting. Investors who look to gold as shelter against inflation, but There were reports that the Bank who wince at its price of \$420 an ounce, started buying silver of England had intervened in the early morning, above \$1.62. These last week, said Robert Bhar, an reports could not be confirmed, but analyst at Rudolf Wolff & Co. dealers said the sharp rise of British "There's been new demand reserves last month showed that the as people realized silver was upbank did not besitate to sell sterling dervalued with respect to platiaggressively to counter upward num and gold." he said.

### TOKYO — Foreign securities firms are spending millions of dollars to set up opera-tions in Tokyo that industry sources say could in many cases lose money.

Thirty-six foreign banks and securities firms are already licensed to trade securities on the Tokyo Stock Exchange, the world's second largest after the New York Stock Exchange. More than 50 are expected to be trading by the end of the year.

But, as deregulation of the market erodes profits on securities transactions and if the global share buying spree of recent years tails off. only those with highly developed financial muscle or agility have a chance, the sources said.

"There will be foreigners' fallout. They come in here with too-glib ideas about how they can survive," said David Miller, director and general manager of the Tokyo branch of Jardine Fleming (Securities).

Despite soaring share values on the Tokyo market, sharp falls in commissions on stock transactions have hurt even those brokerage houses that came to Tokyo early.

"Japanese equives are no longer a very prof-itable business," Mr. Miller said. "The margins are nothing like they were two or three years Bgo. Things are not as rosy as they may seem." Publicly reported earnings of foreign securities houses in Japan for the six months ended Sept. 30, 1986, showed Salomon Brothers Asia

million). Most other firms also reported hefty gains from the previous year.

Foreign Securities Firms May Lose Out in Tokyo

هكنامن لأحل

But analysts say the figures do not disclose the costs of running an international brokerage in one of the world's most expensive cities. Compensation packages, with free housing, for novice analysts routinely run to more than \$100,000 a year, and office rentals are in the millions of dollars.

#### 'There will be foreigners' fallout. They come in here with too-glib ideas about how they can survive.'

--- Darid Miller. Jardine Fleming (Securities).

"I'd be surprised if more than two or three were making money if they bonestly accounted for their costs," said Mr. Miller, whose firm reported earnings of 1.4 billion yen for the six months ended Sept. 30, 1986.

To bring commissions closer to international rates, the Finance Ministry slasbed fixed brokerage fees last year, especially on large-lot

on top with profit of 1.7 billion yen (\$11.6 negotiated as they are in New York and London, the industry sources said.

Page 15

Since last October's deregulation of London's financial markets at least half the equity" trading transactions there have generated no. commission income at all. Stockbroking firmsare unlikely to make money until some are forced out of business, analysts said.

And in London, where Tokyo is currently. being taken to task over alleged obstacles to foreign entry into Japanese business and consumer markets, Japanese financial institutions have emerged as being active in the Eurobond new issues business during the first quarter of, 1987, a field traditionally dominated by U.S. and European houses.

Nontura was a strong first in the top-10 table with 11.1 percent of the market compared with 6.9 percent for Deutsche Bank of West Germany and 6 percent for Credit Suisse First Boston. Two Japanese bouses. Daiwa Securities and Nikko Securities, were in seventh and 10th places respectively.

The first foreign firms to set up shop in Tokyo, especially the six admitted as members of the exchange in February 1986, have an advantage over the latecomers, analysts said. The six are Merrill Lynch Japan, Goldman Sachs International, Morgan Stanley International, Vickers Da Costa, Jardine Fleming (Se transactions. In a few years, all rates may be curities) and S.G. Warburg & Co. (Japan).

**TEXACO:** U.S. Supreme Court Ruling Favors Pennzoil

(Continued from Page 1) not to rule on the central issue in the case - the posting of the bond -was a major blow for Texaco.

Texaco's chairman, Al DeCrane, said after the ruling: "We are prepared to seek to resolve the entire package through discussions." He added: "if a reasonable basis can be found."

Concurrently, Texaco said, it tor. will return to Texas state courts to seek relief from the original bond ruling. ment

Texaco's counsel, David Boies, said: "As long as we are pursuing the matter in Texas court" Pennzoi "has said it will take no action."

However, he said, "if these efforts in the courts and in talks with Pennzoil fail to provide Texaco with the relief needed to continue its appeal of the judgment, Texaco would have no alternative but to

seek protection of a Chapter 11 bankruptcy filing." 1984, an agreement in principle to Pennzoil has repeatedly said that merge. Stands Out in Oklahoma

New York Times Service

BARTLESVILLE, Oklahoma - Phillips's presence has made this city - Oklahoma's seventh-largest and the site of its first oil well an anomalous community. It has only 36,000 residents and the city limits are a five-minute drive in any direction from the Phillips beadquarters.

But because of Phillips, the city's population has a disproportionate number of affluent, highly educated and highly skilled citizens: In Oklahoma, only the university towns of Norman and Stillwater have more residents with advanced degrees.

One consequence is that its 6,500-student public-school system sends most of its graduates to college and it regularly produces a big crop of finalists in the competition for National Merit Scholarships The 1.700-sear Barlesville Community Center has a program that this season included the Chicago Symphony Orchestra, the Negro

Ensemble Company, the Vienna Choir Boys and Parti Page. Phillips's presence has also somewhat insulated Bartlesville from the hard times gripping Oklahoma, whose three basic industries --oil, agriculture and ranching -- are in difficult straits.

Although the company reduced its beadquarters staff to about 5,000, from 9,200 in 1981, much of that was done through early retirement and voluntary separation programs.

#### STARING AT THE SUN

By Julian Barnes. 197 pages. \$15.95. Alfred A: Knopf, 201 East 50th Street, New York, N. Y. 10022.

Reviewed by Christopher Lehmann-Haupt

ONE has come to expect extreme forms of narrative sleight of hand from the English novelist Julian Barnes. In his highly original "Flaubert's Parrot" (1985), he wrote about a man obsessed with Gustave Flaubert, and by encyclopedically evoking the great French novelist and identifying himself with the hus-band of Madame Bovary, the author managed. almost to become Flaubert.

- So it comes as a slight surprise that Barnes's latest novel, "Staring at the Sm," is a relatively straightforward narrative about a lower-middle-class Englishwoman named Jean Serjeant who lives from the 1920s into the 2020s. To borrow the story's central metaphor, it traces

ber life from sourise to sonset. Yet if this new book lacks the artistic tricki-ness of its predecessors, there is a quieter game being played in its pages. That game lies in the language, with words and phrases echoing mu-sically throughout the novel until the homeliest

of phrases is raised up to a kind of poetry. Thus or purases is raised up to a kind of poerry. Thus the expression "staring at the sun" begins by referring to what an RAF fighter pilot does when he is flying east at the crack of dawn, and ends up meaning the contemplation of dealty. The radium of this learning is learn Sec. The medium of this language is Jean Ser-The medium of this language is Jean Ser-jeant, whom we first meet as a 7 year old, wondering why the potted hyacinth sprouts her Uncle Leslie has given her for Christmas are refusing to grow. The opposite of Emma Bo-vary, she lacks all sense of romance, and en-duces so long that her son groups old before her dures so long that her son grows old before her eyes, and memories race "across her sky like Irish weather."

Every person in the book relates to Jean: her mother, who wants her to throw out the hyacinths; her father, who takes her up in a plane to cure her whooping cough; her Uncle Leslie, who plays golf with her; her husband, Michael, who bullies her until she finally leaves him after 20 years of marriage; her son, Gregory, who goes on living near her into his old age; her son's friend Rachel, who wants to sleep with her, and Tommy Prosser, the RAF pilot who first tells her about staring into the sun.

her, and Tommy Prosser, the NAT photometry first tells her about staring into the sum. And every word relates to Jean, who like the young Stephen Dedalus likes to think about language until it yields up all its hidden mean-ings: She thinks about how the pilot described flying at night: The instrument lights "have to be red — red's the only color that works," he says. "So you see, it's all black and red up there." Later her son, Gregory, contemplating God and death, recalls Pascal's description of belief as being a wager: "If you didn't bet, you couldn't win. Put your money on red, put your money on black — there were only two choices." Will Jean Serjeant choose red or black? we are made to wonder. Some of Barnes' wordplay is amusing, like Jean's question to her father "about this new woman prime minister of Austria called Aim, Schluss," or the grafifito that the lesbian Rachel cites: "Three wise men. — are you serious?"

cites: "Three wise men - are you serious?". Some of it gets tedious, like Gregory's debates with himself over "the God question." In fact, as Jean and Gregory move deeper into the 21st century, the novel itself bogs down a bit.

# Leonard-Hagler Bout Should Erase Some Question Marks

By Shirley Povich lew York Times Service

LASVEGAS -- It was two years ago in this town that Marvelous Marvin Hagler's a confidence crisis against Howard and walked into a right hand that put him down for the first time in his life, floored fight? So menacing was Hearns that Hagler was a receding favorite, down to 6-5 and sometimes even money,

his own rascinging monthing fragler and wake up in the morning thinking Hagler and wake up in the morning thinking Hearns." On the eve of Monday night's Hagler. Leonard fight, there was no such indeci-

sion. The conviction was firm that Hagler would win. He was holding up as the almost 31/2-to-I choice to send Sugar Ray Leonard home a beaten challenger.

. That would seem to he quite proper in the case of a great middleweight champion who has not been beaten in 11 years, although there still had to be some misgivings about those odds. Leonard, too, can ht well. He isn't your ordinary target; he thought he could beat Hagler, and he'd been right on 33 of the 34 occasions he had stepped into a professional ring,

A fix on Leonard and his chances would probably be available to everyone in the early minutes of the fight. If he came out as the same cautious, wary Leonard who answered the bell in his 1984 comeback fight against Kevin usually a grudging concession to some Howard, overly defensive and obviously lead-footed overweight oaf. But there is concerned about his once-damaged reti- added irony here: Leonard can snap off

name the round and probably the punch. II was a strange Leonard who suffered down for the first time in his life, floored by a comparative punk. To his credit he

pulled it out with a knockout in the ho-5 and sometimes even money. Bob Martin, Vegas's supreme odds hotbority, defined the betting action in his own fascinating idiom: "They go to

tured all the strength, all the moves and the speed and stamina of his invincible years, plus the pounds of punch he has

added by going from 147-pounder (66.6 kilograms) to middleweight for this fight. Could he be believed? There was irony in the fight films shown incessantly on the Vegas hotel screens, repeats of the principals' fights with Hearns. Leonard is seen dealing Hearns fiercer punishment than did Hagler, even allowing for the shorter distance Hearns went with Hagler.

When he got Hearns in trouble, Leonard appeared at least as murderous as Hagler, maybe more so. It is rarely said of a smaller man that he has "a puncher's chance." That is

na, all would be lost. Hagler could then a big punch. A fair number of clean onepunch knockouts are in his resume, and no less than Hagler he is a finisher when scenting the time for the kill. But for this fight the rub was that the

exact state of Leonard's physical equipment and his mind-set was unverifiable. The naysayers pointed out he has fought

'In my comebacks, I would see the openings

and then punch. When I was in my prime, I'd punch at the same time I saw the openings.'

---- Sugar Ray Robinson only two rounds in five years, recalling noted trainer Ray Arcel's admonitions: "To rest is to rust: If you don't use it you nents to a right jab that is a jolter. Even lose it." Quickness and hand speed al-at 160 pounds, Hagler is a big middleways were Leonard's chief weapons. Did

he still have them? Who truly knew? Without them he would be meat for Hagler, who eats up the sluggards. Hagler's credentials are imposing.

None of the last 37 opponents he faced and's punching speed? Listen to the origcould beat him. He knocked out 32 of inal Sugar Ray (Robinson): "In my

them. He's an annihilator. He can be as comebacks, I would see the openings fierce as he looks with his shaven skull. He and then punch. When I was in my is a switch-hitting ruffian who, one way or another, figured to bring Leonard down. I don't like the word awesome because it's

overused. But Hagler is awesome. So there, Hagler has been given his due. But he does have some flaws. He can be hit. Everybody he fights knows he is a target. John Mugabi whacked him

hard and frequently in their March 1986 bout until Hagler walked through what Mugabi was throwing and stopped him in 11. And Hearns speared him often until Hearns's untimely finish in three.

And Hagler can bleed. Mugabi opened him up badly and so did Hearns. His handlers explain that in each case it was from a butt or an elbow, but listeners get weary of that line. There must have been some punch damage sometime.

In every fight, Hagler uses one favorite tactic to advantage, his switch from left-hander to right-bander in subtle moves that catch opponents unaware. He is a natural lefty who fights that way 60 percent of the time, exposing oppoweight, all his weight natural in contrast to Leonard's newly acquired poundage that brings him up from 147 to some-

where near 158. How has retirement affected Leon-

prime. I'd punch at the same time I saw the openings.

If Leonard has noted flaws in Hagler on film, then Hagler is certainly aware that Leonard had a bit of trouble against the left-banded Avub Kalule in 1981 and had to knock him out to ensure his own safety.

A bothersome thing for Leonard's friends was his dreary workour Thursday, when he appeared oddly uninterested and absorbed some hig shots from his sparring partners. Was it weariness with the whole business? A crisis of confidence? Or. with Hagler's spies on the scene, was Leonard being coy, playing possum in a public workout? He would not be above it.

I ennant does have more moves than Hagler and lays store by what he calls his "lateral movement." Perhaps he be-Irayed his game plan the other day when he said, "I'll make Hagier think twice." He would do anything and everything to frustrate Hagler, much as old pro Roberto Duran did in November 1983.

Leonard (who was there as a television commentator) saw a puffed-up, overthe-hill Duran con Hagler and cuff him around in a fight that went the limit. Leonard, too, has tricks, and perhaps it was Hagler-Duran that was a factor in

The principals: Marvelous Marvin Hagler, left, and Sugar Ray Leonard.

# Major Leagues, Umpires Reach Contract Accord

Compiled by Our Staff From Dispatches NEW YORK - Major league umpires reached agreement Monday on a new labor contract with the American and National Leagues, about two hours before the opening pitch of the 1987 baseball season.

The agreement, with which both sides expressed satisfaction. was reached at about 10 A.M. The Major League Umpires Association had already agreed to work Monday's games even if reement hadn't been reached. Umpires had been stationed Suoday in the cities where they were scheduled to work.

# SPORTS BRIEFS

### Czechoslovak Is Said to Seek Asylum

INDIANAPOLIS (AP) - A Czechoslovakian triple jumper who competed in last month's world indoor track and field championships and did not leave the country with his team has defected, according to a published report.

The Indianapolis News reported Monday that Jan Cado is living and training in the Chicago area. "Cado came into my house and I took him to the immigratioo office in Chicago," Jack Knuepfer, chairman of the board of DuPage County in Illinois, told the newspaper. "He's under the protection of the federal government and has requested political asylum. That's all I know."

By Dick Roraback

Away on this side of the ocean When the chestnuts are hinting of green And the first of the cafe comm Are moving outside for a fine And the sound of spring beats a bolero As Paree sheds her coat and her hat The sound that is missed more than any Is the sound of the crack of a bat. . 🗆

There's an animal kind of a feeling There's a stirring down at Vincennes Zoo And the kid down the hall's getting restless Taking stairs like a young kangaroo Now the dandy is walking his poodle And the concierge sunning her cat But the heart's with the Cubs and the Tigers And the sound of the crack of a bat. 

In the park on the corner run schoolboys With a cauple of cartons for props Kicking goals à la Fontaine and Kopa While a title guy chickies for cops "Goal for us," "Na it's not," "You're a liar," Then the classical shrieks of a spat Destrict art like a chabarb at home plate But it's not like a rhubarb at home plate Or the sound of the crack of a bat.

Here the stadia thrill ta the scruondowns And the soccer fans flock to the games And the chic punt the nags out at Longcham. Where the women are dames and not dames But it's different at Forbes and at Griffith The homes of the Buc and the Nat Where the hotdog and peanut share laurels With the sound of the crack of a bat. 

No, a Yank con't describe ta a Frenchman No, a rank cun l'ascribe ta a l'rendental The rasp of an umpire's call The continuing charms of statistics Changing hist'ry with each strike and ball Nor the self-conscious jog of the shugger Rounding third with the tip of his hat Nor the half-smothered grace of a hook slide Nor the sound of the crack of a bat. 

Now, the golfer is buffing his niblick And the tennis buff's tightening his strings And the tennis buy s ugneting his suring And the fisherman's flexing his flyrod Like a thousand and one other springs Oh, the sports on both sides of the ocean Have a great deal in common, at that But the thing that's not HERE At this time of year Is the sound of the crock of a bar. Reprinted by Popular Request)

Weeks in Sunday night's early going, but the Sabres went on to pepper the Hartford goalie with 49 shots in a 6-0 victory.

The newspaper quoted un ICCS as savin to the immigration office with a Czechoslovak-speaking couple who acted as translators. "He wants to become an American citizen." a source was

quoted as saying. The 6-foot-1 (1.85-meter) Cado finished fourth in the European indoor championships in February with a distance of 55-fect-7% inches and 10th in the world championships at 53-7. He was reported missing by Czechoslovak officials when the team to returned from Indianapolis.

### Simpson Wins Greensboro Golf by 2

GREENSBORO, North Carolina (AP) - Scott Simpson held off back-nine charges by several challengers to break a three-year victory drought with a two-shot triumpb Sunday in the Greensboro Open golf tournament Sunday. Simpson shot a 2-noder-par 70 that included birdies on two of his last

four holes for a four-day total of 282, 6-under. It was his first victory since the 1984 Westchester Classic and his third in nine years on the PGA tour.

As Simpson faltered with bogeys at Nos. 12 and 14, Clarence Rose and John Cook closed fast with 69s and respective totals of 284 and 286. Payne Stewart, who had a double bogey and a bogey on the front nine, put his game together on the back side to finish 70/285. Also at 285 was Tom Byrum (a final 72) and Kenny Knox (67).

### Canadian Sets Speed-Skating Kecord

MONTREAL (AP) - Nathalie Lambert of Montreal posted a time of five minutes, 31.65 seconds to set a world short-track record in the 3,000

# ART BUCHWALD **Tokyo Rose Returns**

WASHINGTON - I didn't Americans, but it is you who must suffer. Just let me tell you what the nese trade war was until I jurned on the shortwave radio and heard Tokyo Rose. For those of you who missed World War II, Tokyo Rose

was an outstanding enemy disc jockey who broadcast pro-paganda for the Japanese. Many believe that 18 World War II would not have been as mucb fun without her. Rose's voice

Buchwald had hardly changed over the years. She said, "Hello, Mr. and Mrs. American Consumer. Your brainless leaders have started a trade war with Nippon that they cannot win. Before it's over they will rue the day they thought they could challenge the productive might of the sacred Imperial Empire.

.....

"Your leaders started this war,

### **ENO Reports Box-Office Record**

**Limited Press Intern** 

 $L^{\text{ONDON}}$  — The English National Opera has reported a record-breaking increase in attendance.

Officials of the ENO, which sings all its operas in English, said that by April 1 the total attendance for the 1986-1987 program was more than 300,000. They paid al-most £3 million (about \$4.8 million) at the box office with an average attendance of 87 percent of

capacity per performance. The most popular work in the repertoire was a modern opera by Philip Glass, "Akhnaten." which sold out, although at special prices. Close behind came Verdi's "Aida" with 99 percent of capacity, Gilbert and Sullivan's "The Mikado" at 97 percent, "Tosca" at 95 percent and Carmen" at 94 percent.

In presenting the 1767-85 pro-gram, Managing Director Peter who bought Japanese microwave Jones said that four operas had to ovens for their kitchens. I could be canceled because of rising costs warn you about those ovens — but and a government grant that did in trade war everything is a secret. not match inflation. Nevertheless So instead I'm going to sign off. As the ENO will stage seven new pro-ductions and 10 revivals. Sun, 'Have a nice Day of Infamy.'"

suffer. Just let me tell you what the Japanese Joint Chiefs of Hitachi plan to do to defend their exports. We are going to fire our 25-inch TV sets across the bow of every American living room.

"Our super VCRs are now programmed to intercept and scramble all NFL football games. No one will be safe from our high-speed laser CDs. How does that grab you, American dogs? If you want war we'll give you war. For every tariff you lay on Japanese goods we will retaliate with a duty of our own.

"To show we mean business, Japan will no longer honor its green warranty cards. Yes, you will be stuck with billions of dollars of Japanese products, and your warranties will be useless. We are also talking about the 90-day, no-questions-asked, money-back guarantees. The Geneva Convention says all green warranty cards are void in time of a trade war. 

"American consumers, you cannot dump on the Japanese without facing the consequences. What if I were to tell you a fleet of our ships is now headed for San Francisco,

and our salesmen will sweep across the Silicon Valley with hundreds of thousands of semiconducter chips? In one week there won't be an intelligible American chip left on the West Coast. Tell your mad leaders to give up their furile was against the Japanese nation before we unleash our elite Seiko brigades and

bring Timex to its knees. "American fools, we possess many billions of yen. If you continue your trade policy there is nothing to prevent a Japan Air Lines 747 from dropping them out of the sky down Paul Volcker's chimney in the Federal Reserve Bank build-

Americans, your situation is helpless. If you want to know how helpless, check it out on our new hand-held Sony calculators. 

"One more thing. I'd like to ad-

By Cynthia Guttman International Herald Tribune

DARIS - "A minute of spring I / often lasts longer / than an hour of December / a week of October / a year of July / a month of February," wrote Jacques Pré-vert of his favorite season in "Le Grand Bal du Printemps." This spring, to mark the 10th anniversary of Prévert's death on April 11, artists, writers and friends are discreetly honoring the poet who despised official ceremonies and confided, toward the end of his life, that "the child that I was, I kept his tears. And 1 kept his smile. And his happy secrets."

Prevent's childhood began with the century in the suburb of Neuilly, became closely allied with the Surrealists in the 1920s, and continued through an intense filmmaking period with Marcel Came on the eve of and during World War II. After 1945, Prévent produced several volumes of poetry (some of that was translated into 79 languages) and a collec-tion of 200 collages, and continued his collaboration with artists

- notably Georges Braque, Pab-lo Picasso, Joan Miró and Alex-Prevert, Jacques Khatchikian and Daniel Lasnon, associate partners ander Calder - and photographers, including Izis, Brassaï, André Villers and Robert Doisof the Galerie des Indépendants on the Place des Vosges in Paris, obtained permission to reproduce a limited series of four collages. "The essential, I think, is to tell The engravings, with their fairy-

a story," said Prevert. "I tell a story. We talk about an image in tale sense of enchantment, fully preserve the vivid colors, finesse poetic terms. You can do it with and raised design of the originals. cissors, with a knife, with any-The collages will later travel to Quebec and New York. thing. For me, you know, written poetry, spoken poetry, filmed poetry, it has always been the same." "He did not want to consider 1943, shows a photograph of his

himself a poet, hut a creator of images and a recreator of language," said Danièle Gasiglia-Laster, author of the first full-length biograohy of Prèvert (1986), a richly-illustrated album. A veritable Prèvert festival is to

neau

be held in July at the Maeght Foundation in Saint-Paul-de-Vence. It will feature Prévert's collages, many manuscripts and letters, and film masterpieces written by Prevert such as "Drole de Drame" (1937), "Quai des Brumes" (1938), "Les Visiteurs du Soir" (1942) and "Les Enfants

the 1920s and 1930s, Prevent du Paradis" (1945). The Galerie shared quarters with the Surreal-Maeght's ties with Prévert date to ists from 1925-1928. In the old the 1950s when Adrien Maeght house of the Rue du Château first exhibited his collages. "reigned an absolute noncon-

formism, a total irreverence and also a beautiful humor," he later More recently, two admirers of recalled. Participating in the Sur-realists' debates, Prévert was as much affected by their creativity as by their ideological conflicts. He left the group with a vira-

Jacques Prévert in 1941 at Tourettes-sur-Loup, and in 1968.

-i Bucho

lent, incisive pamphlet entitled "A Corpse" denouncing André Breton's intolerance and orthodoxy with witry eloquence. But the period's free thinking and unconventionality remained a cor-nerstone of Prevent's work. In the early 1930s he associated with the Groupe Octobre, a political theater troupe of workers and intellectuals aiming at a popular, pro-letarian sudience. Prévert wrote

their plays, a collaboration that culminated in a trip to Moscow in. 1933 to attend "The Olympiads of the Working Theater." Their play, "La Bataille de Fontenoy," earned the first prize.

Many are cruel and terrifying. What all share is the poet's visual Prévert always denounced ausense of staging characters in a thority, but refused to join a politdecor and the pervasive influence ical party. "His behavior was one of a free man, anti-conventional. A noted Bohemian throughout social in the true sense of the word. He was a man who was in love with life," said Alexandre Trauner, who designed the decor for the major films Carné directed

and Prevent wrote. To the Ger-

mans who offered Prévert and Carné the financial backing to make a grand-scale production, Prevert responded, "No, because you haven't got the Jews with

Though it had won first prize at the Venice Film Festival, "Quai des Brumes" also enraged German and Italian officials, who walked out of the theater. Not surprisingly, perhaps: "The film was the apology of a deserter," Trauner said

Subsequent films held a more romanticized, mysterious tone. "During the war and the Occupation, we could not make a film based on current happenings be-cause it would antomatically be denounced," Tranner said. "So we found ourselves making films with the use of fairy tales, angels

and devils to escape from the im-mediate reality." The allegories, interpreted by Arletty, Jean Ga-bin, Michèle Morgan, Pierre Brassenr and others, invariably honor love. Prevent said in the 1960s, Whether it is in film or other, all that interests me is love. You can tell in my films. I love women, and prefer them to men. As one says, they have le beau role." It was not until 1945 that the

first collection of Prevert's poems, "Paroles" (Lyrics) was published. René Bertelé gathered poems previously published in literary reviews, given to friends or kept by Prevert. It sold 5,000 copies in its first week. The title reflects the poet's primary vocation as a dexterous manipulator of language. His poems read as musical conversations. The language is direct and simple. He was enamored of words, word games, people and the city. "We laughed a lot, and we fought a lot," Trauner said. Friends remember his generosity and sense of fun, the endless nights dominated by his soliloquies, rich in humor and lyrical virtuosity, touching on every subject. Always provocative, outspoken, elegant, eternally smoking, he would be bubbling with "36 ideas at the same time, and be able to show the absurd side of

everything that was taken as fact," recalled Doisneau. It was during the 1950s that Prevent sealed close friendships with Miró and Calder, and began to write poems to illustrate their work.

There were long, animated nights in St. Germain-des-Pres, and then the days of strolling, looking, listening. "In the streets of the city, I found my grass of pleasure," he said.

Prevent strolled, often accompanied by Doisneau. "There are things in the street that no one sees any more because they have been there forever and become forgotten," Doisneau said. "Prevert would rediscover the odd. beauty of certain things in the street — an old bike chained to a 1900 Metro entrance. It was the same for words. He loved the names of certain streets. The game was made up of verbs and words whose real meaning and hidden beauty had been forgotten."

When Doisneau recently received a letter from a friend of Prévert's wife, asking him if he would like to plant a tree in memory of Jacques, Doisneau, se-duced by the idea, concluded: "I would plant a lime tree, because it: is always surrounded by bees. buzzing around it." Gesturing in the air, he added, "He never seemed to be working; he was always surrounded by people."
